

SANDTRAY SUITE

MODULE 4: PRACTICAL TOOLS FOR WORKING WITH SMALL CHILDREN IN THE TRAY

When you are working with littles in the tray, what you'll often want to have is some of these kind of tools. So here is a funnel. Again, you can get these at the Dollar Tree for again, like a whole set for a dollar. But they love to watch it do that. That love to move the sand around. And oftentimes that may do that and not even build miniatures. They like to have bowls. Again, get these at the Dollar Tree. And, I really like to have these sifters as well. And I have lots of different sizes of these. These have gotten used so many times over the years. These will be a wonderful addition to your sandtray room.

So, even if you don't work with little kids, but maybe you work with older kids. Remember, the clients that we often get will have trauma. They may have developmental delays. So, they may play as if they are a much younger child. So, again, I would definitely add these to your collection and you may be surprised at how much they get used.
