JURASSIC SAND

4 minutes

So, one of my favorite kinds of sand is Jurassic Sand. And, this is the premium sand that you can get. It's really the most expensive, but it's also going to last you the longest because it's actually made from rocks, and it's gotten from the desert from Jerry who owns the company. He's a geologist out of Utah. So, he gets all these different kinds of substances, and like grinds them up, and makes them into awesome sand for us. So, I want to show you just a few of my favorites. You can go in the website, look and see what you like best, because, again, there's all kinds of stuff. But, all these are antimicrobial, so again, they don't catch germs as much, which is way beneficial for us who work with little ones quite often and don't have to clean the sand all the time.

So, again, we have, I'm going to show you the first is StarDust. And this is actually recycled glass. And my kids like to call this Diamond Sand, and you can see that it is very sparkly, and it has really a different feel to it than traditional sand. So, it's one of the premium sands, so it may cost you a little bit more, but it's really worth it if you fall in love with this sand, which I do. Now, the only drawback to this sand is that it doesn't hold the miniatures as well as some of the traditional sand, so the kids may have difficulty standing it up in the sand, but it's not usually that big of a deal.

OK. So, next here that you can see, is this is the Mojave Desert sand. It is one of the more traditional sands that they do offer. And, again, it's super soft, antimicrobial. A lot of the adults like it because they like just the beige, plain kind of sand.

OK. So, then, we're going to go around here. This is the RiverBed sand. It is from Jurassic Sand as well. It is more, like the grains are bigger. It's more like rocks. Now just a word to the wise. If you choose to put this in your sand tray room, which again, is completely fine. Whatever you put it next to, it's probably going to get mixed in with. So, for me, I had the StarDust next to this RiverBed. So now I have StarDust with little bit of brown granules in it. So, just be aware of that.

SANDTRAY SUITE

Next, this is one of the newest kinds of sands that Jerry has created. It is actually made of garnet. But, it's larger, again, grains, so it kind of feel like rocks. And, you can get either the large or the small garnet sand, which, again, my kids love because it's kind of a pink, purply. Just know that if you get the garnet, you're going to need to order more than what you would traditionally for the other sand, just because of the way that it weighs. Just FYI.

Lastly here, this is the Quick Sand. And, it's super super soft. Again, a lot of my kids like it. It's kind of even seems more of an orangy. Kids and adults like this as well. And, again, it's got a lot different, softer feel to it. So, I like to provide at least a couple of different kind of options, for my adults and kids, just because some of them have sensory issues, and so, some of them may really respond to one type of sand and not the other. But again, if you don't, it's not that big of a deal. It's not going to make or break your sessions at all. So, again, I really recommend, if you're looking for the best of the best, to check out Jurassic Sand and again, use our discount code.
