

Brain Nerd: Party of 1!

Now that you have completed Module 2 you have all kinds of awesome information about how the brain works in the sandtray. So what I want you to do now is:

First, again, check those action items. Make sure you did all those so you can grab all those points. And then, the second thing, is I want you to share in the facebook group your biggest “Ah-ha” moment or your biggest take-away from Module 2 and how you’re going to implement it in your practice.

And I think, again, this is my favorite stuff so I cannot wait to see what you guys come up with and how you’re going to use it to make yourself even a better therapist. OK, I’ll see you in Module 3.
