# Mattress Support Options

You have two options for supporting your new mattresses: foundations with bedframes, and bed platforms. We don't recommend reusing old support systems with new mattresses, or placing a board between the mattress and support system. A high-quality support system is vital for creating the optimal sleep experience.

## Foundations with Bedframes

Foundations must be used with bedframes. Legs should be positioned at the support points shown below.

**9 support points**  
Full XL and Queen-size  
Mattresses

**12 support points**  
King-size Mattresses

## Bed Platforms

Platforms are available in solid and slatted designs.

**Solid Platforms**

**Slatted Platforms**  
5 or more hardwood  
cross slats required  
(spaces between slats  
must not exceed  $\frac{5}{8}$ " )

# Easy Cleaning and Maintenance

Tempur Sealy mattresses are designed for easy care on both a daily and a long-term basis.

## Covers and Encasements

While many of our mattress fabrics are antimicrobial and water-resistant, we recommend using mattress covers and encasements to protect your mattresses. Covers help prevent permanent damage to mattress layers, and encasements help prevent bed bug infestations.

## Regular Housekeeping

Regularly vacuum bare mattresses to remove dust and allergens. Regularly wash and / or replace mattress covers. If a thread comes loose, simply cut it with scissors rather than pulling it.

## Cleaning Spills and Stains

Mattresses should never get wet. Use waterproof mattress covers and encasements whenever possible. If a mattress does get wet, use a towel to remove excess moisture and air-dry. If you must clean a stain, use mild soap with cold water and apply lightly. Don't use dry-cleaning fluid of any type on any mattress.

## Flipping and Rotating

Flip or rotate mattresses at least once every three months. We recommend once a month to maximize comfort life.

**One-sided Mattresses**  
Rotate 180° every 3 months

**Two-sided Mattresses**  
Flip every 3 months

# Moving and Storage

Following Tempur Sealy's guidelines for moving and storing mattresses will help maximize their comfort life.

## Moving Mattresses

Take care when moving mattresses so you don't accidentally damage them.

## Storing Mattresses

Store extra mattresses in flat stacks, not on their ends or sides. Remove and add mattresses according to the diagram.

## WARRANTY

The guidelines in this document will help your warranty remain valid. Most importantly, do not remove the law tag label from the head of the mattress. Keep a copy of it on file, along with your original invoice / bill of lading, in case a warranty issue arises. Read Tempur Sealy's full warranty information at [tempursealyhospitality.com/warranty-information.html](http://tempursealyhospitality.com/warranty-information.html)
