Furman grades play execution on a scale of 0-4. "0" represents a blown assignment. "1" represents a poor block; "2" is a good block; and "3" is an excellent block. A "4" is a "rhino" block, where a lineman puts his opponent on his back. The average grade is calculated by multiplying the number of blocks in a category by its point value, then dividing the total number of points accumulated in all five categories by the number of plays participated in. A 1.85 - 1.99 grade is considered a "winning performance." A grade of 2.00 or better is considered "exceptional." A player must have at least 20 plays in a game to qualify for a "winning" or "exceptional" performance.
