Furman grades individual play execution on a scale of 0-4. "0" represents a blown assignment. "1" represents a poor block. "2" is a good block while a "3" is considered an excellent block. A "4" is a perfect block designation or "rhino" block, where a lineman puts his opponent on his back. The average grade is calculated by multiplying the number of blocks in a category by its point value, then dividing the total number of points accumulated in all five categories by the number of plays participated in. A 1.88-1.99 grade is considered a "winning" performance. A grade of 2.00 or better is considered "exceptional." A player must have at least 20 plays in a game to qualify for a "winning" or "exceptional" performance.
