followed by		Women

Notes: Meet to be held under IAAF rules; schedule subject to change

Officials:

Head of Officials: Donald Kirkland

Meet Referee: Thomas Stewart

Starter: Thomas Meagher

Clerk: Chris Lane

Welcome

The Tradition Continues

Four of the world's most renowned universities renew track and field's oldest international series, a fixture that dates back to 1899. This is the 44th meet pitting the combined teams of Harvard University and Yale University against the University of Oxford and University of Cambridge.

History Lesson

This historic series dates back to July 22, 1899, when Oxford and Cambridge edged Harvard and Yale, five events to four. The series has been renewed regularly, usually on a biannual basis, and the meet has taken place every two years without interruption since 1971. The American schools have fared better in the century since; they hold a 31-12 series lead. Women joined the series in 1981, and the champion has determined by the combined competition since 1983.

The Oxford-Cambridge team won 10 of the first 14 meets, but Harvard-Yale squad has captured each of the last nine and 22 of the last 23. Since the institution of trophies for the separate men's and women's team winners in 2005, the Harvard and Yale women are undefeated and the men are 3-1.

Record-setter: Mayer's javelin throw helped Harvard and Yale post the largest margin of victory in the history of the women's competition (photo courtesy Robert Harle).

In 2011

The Harvard-Yale squad captured a host of close events to take the Naughton Trophy with a 32-7 win at Cambridge's Wilberforce Road Track. Racing under stormy skies, the men from the American schools took the Achilles Trophy by 15-5 margin, while the HY women posted a 17-2 victory to claim the Stead-Sellers Trophy.

The rain could not stop three meet records from falling. Yale's Kate Grace set a new standard in the 800 meters, while fellow Bulldog Nihal Kayali notched a meet-record time of 4:29.74. Harvard's Hannah Mayer threw the javelin a record-long 44.12 meters, more than 30 feet farther than her closest competitor. John van Deventer, an Eli, recorded a new track record in the mile, clocking in at 4:09.29. After a four-decade association with the series, it was the final HYOC meet for Yale coach Mark Young.

A trio of Harvard athletes logged multiple event wins: Daniel Chenoweth in the 5,000 and 10,000, Nico Weiler in the long jump and pole vault and Shannon Watt in the discus and shot put. On the English side, Cambridge's Ben Ellis came back from injury to win at 200 meters and place second at 100. Andrew Bogrand won the javelin to represent Oxford among the medal-winners.

Ancient and Modern Connections

One side of this rivalry features the two oldest universities in the English-speaking world, Oxford and Cambridge. The other side is made up of two of the oldest universities in the United States. U.S. News & World Report lists all four schools among the top seven in its worldwide university rankings.

John Harvard earned degrees from Cambridge in 1632 and 1635 and in 1638 willed his library and half his estate to the new college in the town newly renamed Cambridge. A year later, Harvard College bore his name. Both Yale's network of residential colleges and Harvard's house system are patterned after their English forerunners.

Awards

Naughton Trophy

The trophy is presented to winning team in this championship meet in honor of Joseph Naughton, Harvard '73. Naughton was the winner of the shot put at the 1971 meet. He was diagnosed with cancer the following year and passed away on the eve of the 1973 meet.

The first trophy was placed in competition in 1977. The trophy is awarded jointly to the winning combined team and then splits into two handsome pieces. Each of the winning colleges holds one piece until the next meet two years later.

Achilles Trophy, Stead-Sellers Trophy

Presented by Tim Sellers (Harvard '80, subsequently at both Oxford and Cambridge and winner of the triple jump at the 1981 meet), the Achilles Trophy and the Stead-Sellers Trophy are to be held by the winning team in the men's and women's meets, respectively. They are dedicated to the perpetual renewal of friendship between British and American students through athletic competition. The trophies have been awarded since the 2005 meet at Harvard.

Pat Liles Outstanding Performer Awards

On Nov. 7, 1983, Pat Liles, Harvard '60, passed away in Belmont, Mass. Liles, an outstanding person and business and community leader, earned a doctorate at the Harvard Business School, won a scholarship for study at Cambridge and later taught at the Business School. Prior to the 1985 meet, the Executive Committee, in discussion with Pat's wife, Dagmar, and with the Oxford-Cambridge Achilles Club, endowed awards for the outstanding male and female performers in the meet. The coaches of the four teams select the award recipients.

Boal Hammer Award

The winner of the hammer throw will receive the Boal Hammer Award. It is presented by John L. Thorndike, Harvard '49. The award, a pair of bookends, was presented for the first time in 1979 and is named for Ayres Boal, Harvard 1900, the first winner of the hammer in this meet in 1899.

Medals

Event winners will receive medals.

HYOC and the Friends of Harvard Track

by Bill Okerman

When a track and field team from Oxford competed against one from Yale on July 16, 1894, at the Queen's Club grounds in London, it was the first international track and field meet of the modern era, predating by two years the first modern Olympic Games. In October of the following year, a team from Cambridge traveled to New York to meet Yale at Manhattan Field. The first competition between a combined team from Harvard and Yale and one from Oxford and Cambridge took place at the Queen's Club grounds in 1899. The combined teams met again in 1901 (New York), 1904 (London) and 1911 (London). Beginning in 1921, the two combined teams began meeting biennially, alternating between the two countries. The 1939 meet was held in London just weeks before Great Britain entered World War II.

Following the resumption of its formal athletic program after the war, Harvard fielded good track and field teams, winning the Outdoor Heptagonal meet in 1947. Yale's post-war track program was also on firm ground, winning the Heps in 1948. But one important part of the pre-war program was missing – the biennial contest between the combined Harvard and Yale team and one from Oxford and Cambridge. Alumni and

officials from both colleges were anxious to revive the international meet.

The recovery of the British economy from the war posed a significant challenge to the resumption of the Transatlantic Series, but a large share of the costs was able to be underwritten due to the generosity of parents of athletes and a small number of former Harvard and Yale trackmen. As had been the pre-war custom, the Harvard-Yale team was selected based upon the first two place finishers in the annual dual meet between the two colleges, and the costs were shared equally. An agreement was reached whereby the traditional four-year cycle would be resumed with an Oxford-Cambridge team competing against a Harvard-Yale team in Harvard Stadium in late June 1949.

A crowd of about 5,000 watched the Brits win 8-5, featuring Oxford's Roger Bannister winning the mile in the outstanding time of 4:11.9. Five years later he broke the four-minute mark at Oxford. Unfortunately for Harvard, by 1949 Yale had become the overwhelming dominant of the two rivals. The American team included only four Harvard athletes, one varsity runner together with three who qualified from superior performances in the freshman meet. With Yale continuing its overwhelming dominance over Harvard into the 1950s, when the cycle was completed with a meet in London in 1951, Harvard, with little hope of being able to attract the needed contributions to continue, dropped out of the series. However, Yale's coach Bob Giegengack found Army to pair up with for the next four-year cycle.

With the appointment of Bill McCurdy as track coach in 1952, Harvard's fortunes improved immediately. Several alumni believed that this success warranted a stronger program, and that a good place to start would be to investigate rejoining Yale in the series. So in 1955, two teammates from Harvard's Class of '49, distance runner Jack Cogan, who had been the lone varsity athlete to qualify for the 1949 Harvard-Yale team, and

Remembered: Pat Liles '60 is the namesake of the meet's top individual awards.

Back on track: The HYOC series resumed in 1957, and Harvard's French Anderson edged Bob Solomon of Oxford for the win at 440 yards.

John Thorndike, who had placed second in the hammer throw in the 1949 Harvard-Yale dual meet but did not compete in that year's Harvard-Yale v. Oxford-Cambridge meet because the hammer had been dropped from the meet schedule after 1921, met with the new athletic director Tom Bolles, who had been a very successful crew coach, to learn whether and how this could be done.

Bolles described to the two former Harvard trackmen certain successes in other sports and particularly the workings of the Friends of Harvard Crew, who successfully raised money for numerous crew expenses beyond the Athletic Department's budget. He suggested that they investigate whether a similar group could be formed to do this for track and field. Cogan and Thorndike reported these suggestions to other interested track alumni, and soon a letter of inquiry was sent out by Al Ruby '50 (now known as Mark London) to all former trackmen. The response was surprisingly strong and the Friends of Harvard Track was organized in 1955 under the leadership of Alex Northrop '38, a former captain and outstanding middle distance runner and a member of the 1937 Harvard-Yale team. As a result of these generous efforts and those of many others to follow, Harvard was restored to the American team in 1957.

In June 1975, Thorndike boarded a plane at Boston's Logan Airport to accompany the Harvard-Yale team on their quadrennial trip to England for the 25th renewal of the competition against Oxford-Cambridge. Having remained an avid supporter of

Harvard track and field, he was then serving as the chairman of the Friends of Harvard Track (with his teammate Jack Cogan serving with him as vice chairman). Although, unlike had been the case during the late 1940s and early '50s, Harvard, with McCurdy still at the helm, continued to field strong teams in the 1970s, several members of the Friends at that time had begun questioning whether Harvard's participation in the series should be continued. As a result of those concerns, Thorndike had been urged by the Executive Committee to accompany the team to obtain a firsthand view as to its merit. The team competed against Oxford-Cambridge at Oxford's legendary Iffley Road track – the site of Oxford's Bannister's world-record 3:59.4 mile in 1954 – and against a number of other teams in meets at Birmingham, Edinburgh and Dublin. Upon his return home, Thorndike reported to the Friends, "I was pleased and impressed by the overall good performances and the enjoyable time our athletes had. I concluded very emphatically that we should try very hard to maintain this traditional meet as the benefits to the competitors are numerous, greatly appreciated, and are worth the considerable cost." Having been privileged to have been a member of that year's team, I can attest to John's assessment of the tour, and to the fact that it was made all the more enjoyable for the competitors by his camaraderie and enthusiastic support.

Since resuming the series in 1957, there have been, as a result of the continuing efforts and generosity of many benefactors on both sides of the Atlantic, 27 very successful Harvard-Yale v. Oxford-Cambridge meets, the last 15 of which, beginning in 1983, have included women's events. The last time Harvard hosted the meet, in 2005, marked the 50th anniversary of the founding of the Friends of Harvard Track. The Friends have come a long way with the support of many since Jack Cogan and John Thorndike took it upon themselves to get things off the ground. This year's meet will mark the 44th time over a period of 114 years that the two combined teams have met. May there be many more meets to come.

The Achilles Club

by Paul Wilcox

The Achilles Club, which traces its roots back to the first varsity sports of 1864, was formed in 1920 by and for past and present representatives of Oxford and Cambridge Universities. Members have won 20 Olympic gold medals (most recently Alastair Brownlee, 2012 Olympic champion in triathlon, and Steph Cook, 2000 Olympic champion in modern pentathlon), and held 38 world records.

In the amateur age between the Wars the Club was the strongest in Britain. Its members enjoyed more opportunity for training than most and made up the greater part of the British Olympic team. Champions like Harold Abrahams, Lord Burghley and Jack Lovelock (New Zealand) were household names, but they supported the Club's regular exhibition matches against schools throughout the country, to encourage the growth of the sport. Very popular books passing on their expertise were published, and members contributed at the highest national and international level as coaches, promoters and administrators.

After the Second World War, Achilles athletes remained to the fore. Roger Bannister's achievements captured the imagination of the whole world; Chris Chataway was the darling of the White City; and Chris Brasher struck Olympic gold in Melbourne. By then, however, more clubs were forming as tracks were constructed around Britain. Participation in athletics soared, and with it standards of performance, while at the Universities academic pressures assumed a greater significance.

Nevertheless, the Achilles Club continues to thrive. Members like Jon Ridgeon, Craig Masback (USA) and Richard Nerurkar continue to make their mark on the world stage, both as competitors and as administrators. In the last 10 years Club teams have competed in China, Hong Kong,

Japan, Singapore, Australia, South Africa, Estonia, Finland, Italy, Germany and France, and in September 2014 will again be touring the Orient. (Harvard and Yale alumni will be most welcome to join them.)

The jewel in the crown of the Club's overseas connections remains the Transatlantic Series. The Oxford v. Yale match in London in 1894 was the first international track and field meet of the modern era. In 1895 Cambridge met Yale in New York, followed by the first meeting of the combined teams in London in 1899. The true significance of the series echoes down the century of past commentators: the friendships forged and the unique opportunities for international understanding. It is an appreciation of these factors which has kept the series alive through periods of difficulty, and which has inspired benefactors on both sides of the Atlantic to support its traditions with their efforts and generosity.

Victorious: Oxford's Derek Johnson wins the 440-yard run in London in 1955.

HYOC2011 in Pictures

by Robert Harle

HYOC2013

The series flourishes thanks to the support of the Achilles Trust, the American Achilles Foundation, the Friends of Harvard Track and the Yale Athletic Association, and to the goodwill, foresight and generosity of the participants and benefactors from the 19th century to the present day.
