## THE COACHES

**South Alabama** **Matthew Graves** (Butler, 1998)  
Record at USA: 59-84 (5th year)  
Overall Record: Same  
Record vs. Texas State: 2-6

**Texas State** **Danny Kaspar** (North Texas, 1978)  
Record at TXST: 67-77 (5th year)  
Overall Record: 532-270 (27th year)

## LAST GAME

South Alabama edged Georgia Southern on Sunday 69-67. Texas State won at Coastal Carolina 53-48.

## NEXT GAME

The Jaguars stay in Texas to take on UTA Saturday afternoon. The Bobcats host Troy.

## ON THE AIR

Radio: 99.5 FM The Jag; **J.D. Byars** (pxp)  
On the web: 995thejag.com/listen (audio); Texas State Bobcats All-Access (video)

## RANKINGS (Through Jan. 2)

USA: #220 RPI, #203 Sagarin  
TXST: #315 RPI, #211 Sagarin

## THE SERIES

Texas State leads 6-2.

Current streak: Texas State, 1 win

Last meeting: Texas State 90, South Alabama 64 (2/27/17)

USA's last win in the series: 72-67 OT (1/14/17)

USA's last win in Strahan Coliseum: None

TXST's last win in Strahan Coliseum: 90-64 (2/27/17)

USA's record in Strahan Coliseum: 0-4

USA's road streak: Lost 4

USA's longest winning / losing streak in series: 1 / 4

**Notes:** The two schools have met just eight times in their history, all after Texas State joined the Sun Belt Conference starting in 2013-14... The Jaguars stopped a four-game losing streak in the series last year at home in overtime.

Probable Starters Highlighted

## PREVIEWING THURSDAY

### Head coach Matthew Graves on Texas State

**On what the team can do to keep its run going:** "I think we have to keep hanging our hat on the defensive end of the floor. We're doing a great job of making opponents shoot one tough shot and doing a much better job rebounding that missed shot. If we continue to do that, our offense has shown an ability to get hot. We have to continue working on that side of the ball."

**On what can change to win in Texas:** "Obviously we haven't had success on the Texas swing, but you have to isolate it and focus on the game at hand, and go into it with the mindset of playing solid defense on the road. We have to take care of the basketball and take great shots. It's not a magic formula – it's a mindset and bringing some toughness and an ability to focus away from home."

**On Texas State:** "I believe that Coach Kaspar is one of the best defensive coaches in the country. He gets his kids in a stance, they're physical, they play really hard, and they make it difficult to score. The last couple of days of practice, we've really preached about being strong with the ball and we understand that there's going to be fouling and contact that won't be called, and you have to have the mindset to play through that. Those are the things that you have to take with you when you go on the court against this Texas State team."

**On Nijal Pearson:** "I think Pearson is one of the most versatile players in the league. He does a great job for them offensively scoring in the paint, from the 3-point line and the free-throw line. He does a good job of getting to the offensive glass and he defends on the other end of the floor as well – he's second on the team in steals. He's a complete basketball player and does a great job for them."

## SOUTH ALABAMA'S LAST GAME

### South Alabama 69, Georgia Southern 67 • December 31, 2017

**MOBILE, Ala.** — University of South Alabama junior Rodrick Sikes led all scorers with 27 points and the men's basketball team survived a last-second shot to edge Georgia Southern 69-67 Sunday afternoon at the Mitchell Center.

A layup from Quan Jackson with 46.5 seconds left gave Georgia Southern (10-4, 1-1 Sun Belt) a 67-66 lead, but senior Nick Davis regained the lead with a putback with 29.5 on the clock. Jackson missed a 3-pointer on the Eagles' next possession, and after a free throw from USA sophomore Herb McGee, Jackson was off the mark again as time expired.

Sikes, the only Jaguar (8-6, 2-0) in double-digit points, hit five 3-pointers and went 8 for 9 from the free-throw line, including all three attempts with 1:40 left to break a 63-63 tie.

## GAME FACTS

- The largest lead for either team in the final 18 minutes of the game was four
- Georgia Southern missed its first seven shots and fell behind 16-3 in the early going, but hit a half-court shot at the buzzer to only trail at intermission 39-35
- Sikes opened the second half with a triple, but the Eagles scored the next eight points to take their first lead of the contest
- The score was tied seven times and changed hands eight times in the second half
- After GS's Jake Allsmiller and sophomore Jordan Andrews traded 3-pointers, the Eagles' Mike Hughes knotted the score at 63-63 with 3:18 left with a free throw
- Sikes went 3 for 3 at the line at the 1:40 mark to go up 66-63, but Toookie Brown converted twice at the line 15 seconds later, then Jackson followed with a layup to retake the lead
- Jackson led Georgia Southern with 14 points, and Hughes and Brown added 13 and 12, respectively.

## THEY SAID IT

### Head Coach Matthew Graves

**Opening statement:** "Obviously, I'm very excited and proud of our team protecting our home court. (We're) 2-0 in league play, it's hard to win in league play, but especially when you go on the road it's hard to win. Every game at home matters. Our guys are starting to value that and appreciate that. We played really good defensively. Obviously they got a shot there late – that's a great set that they ran. I thought we rebounded the ball when we needed to in crucial situations. Rodrick stepped up and made three free throws there, and we held on."

**On the confidence of the team:** "Rodrick is obviously scoring the ball really well for us. We need him to continue to do that and take good shots. There's some shots you would like to take back. When a shooter has that much confidence and he knows that he doesn't have to worry about coming out of the game when he takes a bad one every now and then, as long as he guards, we're going to be okay. They took Josh away tonight. They did a good job defending Josh, but Josh really embraced that. He got eight defensive rebounds for us inside. When you look through the balance of scoring, several guys stepped up and made shots at different times. Jordan Andrews made a big

## OPENING TIP

- South Alabama is 2-0 in the Sun Belt for the first time since 2012-13.
- The Jags' 8-6 record before New Year's Day is their best since 2011-12.
- USA has lost 11 straight road games in the state of Texas.
- South Alabama is 6-2 when scoring fewer than 70 points in a game. The team had nine such wins in head coach Matthew Graves' first four years combined.
- Thursday will be a matchup of the league's top two scoring defenses. Texas State is first at 62.5 ppg and South Alabama is next with 65.3 ppg. The Jaguars are first in field-goal percentage defense (.395) and 3-point defense (.297). The Bobcats are sixth in field goal defense (.422) and second in 3-point defense (.306).
- Nationally, the Jags are 25th in 3-point defense, 35th in field goal defense and 39th in scoring defense.
- Winning the rebounding and shooting battle has been key for the Jaguars this season. The team is 6-1 when outshooting its opponent and 5-1 when winning the battle of the boards. USA lost both categories Sunday against Georgia Southern, giving up a season-high 51 rebounds, but still managed to pull out the win.
- USA's 34.4 shooting percentage against Georgia Southern is the lowest in a win since Feb. 11, 2010.
- Rodrick Sikes, who was named the Sun Belt Player of the Week on Tuesday, is averaging 30.7 points and 5.7 treys in his last three games. He had a game-high 27 Sunday, shooting 5 for 10 from 3-point land and 8 for 9 from the free-throw line.
- Sikes, who has scored double-digit points in 13 consecutive games, is fifth in the conference in scoring (18.4 ppg) and second in 3-pointers per game (3.2). His 3-point average is 28th in Division I.
- Sikes has three 30-point games this season, the most by a USA player since Augustine Rubit had four in 2012-13.
- Josh Ajayi had his eight-game double-digit point streak snapped vs. Georgia Southern, but he scored his 500th career point, the most by any active player on the team. He still grabbed a team-high-tying eight rebounds and is averaging 9.0 rpg in his last two games.
- Herb McGee is averaging 5.3 assists in his last three games after dishing out a team-best four on Sunday.
- The Bobcats' Nijal Pearson is the team's leading scorer with 14.6 ppg. He is second on the team in 3s (26), assists (27), blocks (6) and steals (19).
- Pearson is averaged 14.5 points against the Jags last year, including 15 in San Marcos. He had seven rebounds and four steals in Mobile.

'3' there late after they hit a '3.' Our guys are gaining more confidence, and I think that is going to continue as we go out on the road."

**On this being something he saw coming on Rodrick:** "There's no way I think anybody saw that. I don't mean that in a negative way to Rodrick. We felt when we recruited him that he would be a double-figure scorer for us, you know 10 to 12 points per game. To his credit, he's really embraced our system, especially defensively, and that kid is always in the gym. He finds a way to get a manager to rebound for him or he gets the gun out and he gets shots up. He's a product of hard work and getting extra reps in. I'm so happy for him. He's earned everything he's gotten so far."

**On the difference in getting a win like this compared to previous seasons:** "The biggest difference has been our defense. Our identity is on the defensive end of the floor. When you go through the statistics, we're in the top three in our league in a lot of different categories defensively. We probably slipped a little bit tonight in defensive rebounding, but we're doing a much better job on the glass this year. We're being more physical getting to the ball. I think you can just see guys getting more comfortable in our system. The rotation, we're starting to figure out when to sub guys and who's playing well with who. As a coaching staff, we're growing with the guys. It's going to be a lot of fun this next two and a half or three months."

## TEXAS STATE'S LAST GAME

**Texas State 53, Coastal Carolina 48 • December 31, 2017**

**CONWAY, S.C.** — Shooting was like day and night for the Texas State men's basketball team Sunday afternoon at the HTC Center but held on for a 53-48 victory against Coastal Carolina. The Bobcats made 65.0 percent of their shots in the opening half but were held to 27.3 percent in the final 20 minutes, while shooting 42.5 percent (19-of-42) for the contest.

TXST improved to 8-7 on the season and 1-1 in the Sun Belt Conference while the Chanticleers drop to 7-8 overall and 1-1 in conference play. The win also gave the Bobcats its eighth consecutive month of a .500 record or better.

"This was a great win for us after coming off the disappointing loss to Appalachian State. Our guys have played for about 74 of the 80 minutes on this road trip," said head coach Danny Kaspar. "This is a very tough road trip in terms of travel and I am really thankful for the guys' efforts in both games this weekend."

Nijal Pearson got the scoring going with an 18-foot jumper after a defensive stop by TXST. Nearly three minutes into the contest, Tyler Blount knocked down a three-pointer as the Bobcats scored the first seven points of the game.

Back-to-back three-pointers from Nedeljko Prijovic and Blount kicked started a 10-2 run for TXST over a 3:03 span. All of 10 points were scored by the duo with them netting five points apiece.

Alex Peacock and Pearson knocked down treys on consecutive possessions to give the Bobcats' their largest lead of the game at 30-16 with 4:21 left in the opening stanza.

CCU would end the half by scoring eight of the final 10 points as TXST took a 32-24 lead into halftime. TXST's lone points coming on a desperation toss in the lane after contact by Blount that miraculously went through the hoop.

The Bobcats extended their lead to 38-28 after a layup by Peacock and two free throws from Blount. The Peacock layup at the 17:09 mark was the last by TXST until the junior forward made another one with 7:20 left on the clock. During that stretch, CCU was able to cut the lead down to two.

Four straight Chanticleer free throws knotted the game at 43. Pearson was able to get to the basket with just enough on his attempt to get the ball to fall into the basket at the 3:24 mark. CCU answered back with two more charity stripe makes on its next possession.

Two free throws courtesy of Pearson and a jumper by Prijovic from the charity stripe increased the advantage to 49-45. Twice in the final minute the Chanticleers were able to get within two.

A 1-for-2 trip at the line by Tre'Larenz Nottingham increased the score to 51-48 in favor of the Bobcats with 6.8 showing on the clock. CCU's Zac Cuthbertson was fouled and missed his first free throw attempt as 4.6 seconds remained in the game. He purposely missed his second attempt but completely missed the rim to automatically turn the ball over.

Pearson then threw a long pass down court to Peacock, who raced to the basket for the game sealing layup.

Leading the way offensively for TXST was Pearson with 15 points on 5-of-12 shooting and a made trey. He also converted 4-of-6 at the free throw line.

Blount netted 14 points, 12 of which came in the first half. The senior knocked down 5-of-8 from the field with a 2-for-5 performance from the charity stripe.

Peacock just missed reaching double-figures with nine points. Coming off the bench, Prijovic added seven points and four rebounds.

Leading the team in assists and rebounds was Marlin Davis. The Houston native grabbed a career-high seven boards and handed out three assists.

## THE LAST TIME THEY MET

**Texas State 90, South Alabama 64 • February 27, 2017**

**SAN MARCOS, Texas** — The Texas State men's basketball jumped out to a 13-2 lead and never trailed in a 90-64 win over the University of South Alabama Monday night at Strahan Coliseum.

The Bobcats improve to 17-11 overall and 10-6 in the Sun Belt Conference. The Jags drop their third straight to fall to 13-16 and 6-10.

"The biggest thing with Texas State is they're defending at a really high level," USA head coach Matthew Graves said. "They're the most physical team in our league guarding and they don't give you an opportunity to get easy baskets. Offensively, they're very patient and make you guard for long possessions. They take advantage of mismatches and then you throw in a first-team all-league guy like (Kavin) Gilder-Tilbury, you have the makings of a really good basketball team that's peaking at the right time."

Texas State shot 58.6 percent from the floor and 42.9 percent from 3-point land, and won the rebounding battle 36-21.

The Bobcats scored 13 of the first 15 points – seven from Kavin Gilder-Tilbury – after converting 5 of 6 to start the contest. On the other end of the court, the Jags went just 1 for 5 with a turnover.

"Obviously we didn't get off to a very good start and we subbed right away," Graves said. "The physicality really

bothered us. It was something we talked about Sunday at film and in practice, and attempted to re-emphasize on Monday. I need to do a better job of getting that message through because they punched us in the mouth in the first half and we didn't respond."

South Alabama scored six unanswered to get within seven with 5:40 left in the first half, but Texas State finished with a 16-5 run, including a triple from Gilder-Tilbury just before the buzzer to take a 45-27 lead into the break.

USA used a 14-6 run right after halftime to get back in the game and was down just 51-41 with 15:38 to go, but TXST answered with a 12-5 burst to go back up 17.

Later in the half, the Bobcats went on a 14-2 run take their largest lead of the game, 79-52.

"In the first 10 minutes of the second half, we played with physicality and shared the basketball, and defended the way we're capable of," Graves stated. "The problem is when you dig yourself such a deep hole, it's very difficult to come back.

"To their credit, they made five shots with one second on the shot clock. They did a good job of running their offense all the way down and converting at the end. They banked two 3-point shots in, so it wasn't our night."

Gilder-Tilbury led all scorers with 26 points – his most ever against South Alabama – by shooting 10 for 15 from the field and 4 for 8 from 3-point land. He made it a double-double with a game-best 11 rebounds.

"He was phenomenal tonight," Graves said. "If we had the most improved player award in the Sun Belt, I think he would be right there in the mix to get that. That young man has worked really hard on his game and he played extremely well for them tonight. He did a wonderful job."

Nijal Pearson joined Gilder-Tilbury in double-figures with 15 points. Ojai Black had 14 points, Marlin Davis added 11 and Nedeljko Prijovic tallied 10; they combined to shoot 13 for 16 from the floor.

Senior Ken Williams (Houston, Texas) was the only Jaguar in double-figures with 14.

#### WELCOME BACK!

In his first game since finishing the 2015-16 season at Youngstown State, **Jordan Andrews** made quite an impact... Andrews led all scorers at Texas Tech with 15 points, going 7 for 7 from the free-throw line... He went 2 for 7 from 3-point land and added two assists.

#### 50th SEASON OF BASKETBALL

The 2017-18 campaign will be the 50th season of South Alabama men's basketball, dating back to the Jaguars' first varsity season in 1968-69... Throughout the year, the school will be celebrating the history of the program, culminating in a jersey retirement ceremony on Jan. 20 of Junie Lewis and Jeff Hodge.

#### GOING FOR #800

The South Alabama basketball program will be attempting to win the 800th game in its history this season... The Jaguars are 797-625 all time... The team's 700th win came Jan. 22, 2011 against Florida International.

#### REUNITED (AND IT FEELS SO GOOD)

**Herb McGee** and **Jordan Andrews** were high school teammates at Riverside Academy in Reserve, La. ... The pair played on three state championship teams in their time together... Andrews played his freshman season at Youngstown State before transferring to South Alabama prior to the 2016-17 season.

#### BACK IN UNIFORM

After having to sit out last season due to NCAA transfer rules, sophomore **Jordan Andrews** will be seeing his first game action since the 2015-16 season... Andrews spent his freshman campaign at Youngstown State, where he was named to the Horizon League's all-Freshman team... In his one season with the Penguins, Andrews made 19 starts, averaged 7.9 points and broke the school's freshman 3-point record with 50 triples... He shot 36.7 percent from long range and hit three treys or more seven times.

#### ONE AND DONE

**Rozelle Nix** is the South Alabama men's basketball program's first graduate transfer... The Cincinnati, Ohio native spent last season at Pittsburgh, where he averaged 1.4 points in 20 appearances... Nix sat out the 2015-16 campaign due to injury, and attended Pensacola Junior College as a freshman and sophomore.

#### MITCHELL FINISHES STRONG

Prior to joining the starting lineup on Jan. 23 last season, **Trhae Mitchell** averaged 1.1 points and 1.8 rebounds in 7.7 minutes over 15 games, but after getting his first starting assignment at Arkansas State, Mitchell broke out and averaged 6.2 points in 22.4 minutes of action, while shooting 69.6 percent from the floor and 70.0 percent from 3-point land... He had two double-digit point performances over that span, coming in back-to-back games vs. Coastal Carolina and UTA... Mitchell also had multiple blocks in six games, including a career-best four at Texas State.

## CAUSING HAVOK

The Jaguars were the Sun Belt's best team in creating problems for opposing offenses last year and ranked among the top teams in the nation... South Alabama led the league in turnover margin (+3.2), steals (7.5 spg) and turnovers forced (16.3 pg)... The team ranked in the top 50 in Division I in all three categories and the top 20 in two... The Jags were 13th in turnovers forced, 16th in turnover margin and 42nd in steals.

## JAGUARS WIN BIG

South Alabama defeated Blue Mountain (Miss.) 88-35 in the team's 2016-17 home opener, which is tied for the second-largest win in school history, and biggest since 1979-80... The Toppers were held to 11 first-half points, tied for the fewest before halftime since Georgia State scored two in 1981-82, and the 35 points total are tied for the fifth-lowest total in school history.

## HOME OPENING SUCCESS

In the 49 years of the program, the Jaguars have a history of successful home openers... USA sports a 42-8 record in its home opening contests and has won 26 in a row... The last loss was 81-75 to Southern Miss in 1991... The streak was extended in November with an 88-35 win over Blue Mountain... Spring Hill is the most frequent victim during the streak, losing three times... The Jaguars have defeated Abilene Christian, Alabama State, Alcorn State and Prairie View A&M twice each in season lid-lifters.

## JAGUARS PICKED NINTH IN PRESEASON POLL

In a poll of the league's coaches, South Alabama received 43 points in the preseason poll and was voted ninth... UTA garnered 128 points and nine of 12 first-place votes, while Georgia State earned 116 points and one first-place nod... Defending tournament champion Troy (115, 1 first-place vote) was third, Georgia Southern (114) was fourth and Louisiana (113) was fifth.

## ACCURACY IS THE KEY TO SUCCESS

Under head coach **Matthew Graves**, South Alabama is 46-15 (.754) when compiling a higher shooting percentage than its opponent — 26-11 (.703) vs. SBC schools — but 13-69 (.159) — 7-39 (.152) vs. Sun Belt teams — when being outshot... In 2015-16, the Jags were 13-3 with the shooting advantage and 1-16 without it... In 2014-15, South Alabama was 9-3 when winning the shooting battle but 3-18 (1-18 vs. Division I opponents) when losing it.

## THAT 70s SHOW

When scoring 70 or more since the start of the 2013-14 season, the Jaguars are 42-26 (.618), but 15-58 (.205) when scoring 69 or fewer... In 2015-16, the Jaguars were 11-5 with 70-plus and 3-14 when under 70... The season prior, South Alabama was 10-5, its lowest win percentage when scoring 70-plus in the last eight years, and was 2-16 when scoring 69 or fewer.

## AT HOME IN THE MITCHELL CENTER

Since the facility opened in 1999, the Jaguars have established a winning tradition on their home floor, the Mitchell Center... In 15 seasons, South Alabama has a 185-86 (.683) record and has eight seasons of 10 or more wins... In 2007-08 the Jags posted a 17-1 slate in front of their home fans (17-0 in the regular season), the second-most home wins in school history (19, 1973-74).

## NICE TO MEET YOU

South Alabama will be taking on three first-time opponents this season: Trinity Baptist, La Salle and Saint Peter's... The Jaguars faced Saint Peter's on the second day of the Naismith Hall of Fame Tip-Off.

## Matthew Graves

### Head Coach Butler, 1998 5th Season

From the moment he was hired in March 2013, University of South Alabama men's basketball head coach Matthew Graves made it a top priority to "change the culture" at South Alabama.

After spending 17 years at Butler University as both a student-athlete and coach, Graves set out to take the Butler philosophy and install that in the Jaguar men's basketball program.

Entering his fourth season, Graves is laying the foundation for success.

From revamping academics and a greater involvement in community service activities, to restructuring off-season workouts and practices to emphasize skill development, to the style of play during games, every aspect of the program has been evaluated and fine-tuned to Graves' standards.

The process aims to establish long-term prosperity both on and off the court, contending for championships while graduating student-athletes year in, and year out.

Overhauling the academic program resulted in the team's highest GPA in over five years in 2013-14, and both seniors, Antoine Allen and Augustine Rubit earned their degrees.

On the court, his first year in charge resulted in an 11-20 record with a roster that included 10 first- or second-year players, with inexperience rearing its ugly head in the 11 times the Jags let a second-half lead slip away. However, Rubit set both school and conference records for rebounds and became the first Jaguar to earn All-Sun Belt recognition four times.

Rubit finished in the top 10 in five different individual categories and ranked third in the league in rebounding (9.4 rpg) and sixth in scoring (17.0 ppg).

Graves' style of play and work on the court helped Barrington Stevens III go from a 0.7 assist-turnover ratio his freshman campaign to a 2.0 as a sophomore, the best ratio by a South Alabama player since 1988-89.

His second season may have only resulted in one more win overall, but the improvements on the court were noticeable. The Jaguars' increased conference wins from five to nine and earned the No. 6 seed in the Sun Belt Tournament, a year after failing to qualify.

After a slow start to the campaign, South Alabama finished with 10 wins over the final 21 contests and won the program's first SBC Tournament game since 2012.

In conference games, the Jags were fourth in scoring (72.4 ppg), second in field goal percentage (.454) and first in 3-point percentage (.369). The team improved by almost six points per contest in the final 22 games, and increased its field goal and 3-point percentages by 5.7 and 5.8 percent, respectively.

A major driving force in that improvement was the Ken Williams, who earned all-Sun Belt distinction after averaging 15.7 points — eighth in the league — and converting 2.6 treys per outing, which was second. In league games, he was fourth in scoring average (18.0 ppg) and 3-point percentage (.403), and first in 3s per game (2.8).

The 2015-16 season saw Williams earn a Third-Team All-Sun Belt nod and the Jaguars improve their win total yet again to 14. USA advanced to the Sun Belt Quarterfinals and won a game in the tournament in back-to-back years for the first time since 2010.

Graves spent the previous 10 seasons as an assistant on the staff at Butler, where his efforts helped the Bulldogs advance to back-to-back NCAA Tournament championship games and appear in the event in six of the last seven years.

During his tenure at Butler, Graves helped the program to an overall record of 244-98 (71.3%), a berth in national postseason tournaments each of the last eight seasons and eight straight years with 20-plus victories. Following the 2009-10 campaign that saw the Bulldogs finish 33-5 after falling to Duke 61-59 in the national title contest, he was promoted to associate head coach; in his first year in that role, Butler returned to the NCAA Tournament championship game after defeating Pittsburgh, Florida and Wisconsin — the first, second and fourth seeds — in the Southeast Region while going on to post a 28-10 record.

In 2012-13, the Bulldogs' first in the Atlantic 10 Conference, they went 27-9 including an 11-5 mark in league action. In addition to advancing to the third round of the NCAA Tournament, Butler defeated two of the four No. 1 seeds in the event — Indiana and Gonzaga — during the regular season.

Graves first helped lead Butler back to postseason play in 2005-06, when the school went 20-13 after earning a first-round win in the National Invitation Tournament. The following year, the Bulldogs won the NIT Season Tip-Off and advanced to the Sweet 16 of the NCAA Tournament before falling to eventual champion Florida en route to a final record of 29-7. Butler finished 30-4 after claiming the Horizon League Tournament title and a first-round NCAA win in 2007-08, advancing to the NCAA Tournament again the next season while posting a 26-6 mark.

While on the Butler staff, Graves was listed No. 2 on CollegeInsider.com's ranking of top 25 mid-major assistants in 2009 while the previous year FoxSports.com recognized him as one of the top 10 mid-major assistants in the country.

Graves started as an assistant coach at North Central and Ben Davis High Schools in Indianapolis, joining the Bulldog staff as coordinator of men's basketball operations in 2001. During his first two seasons at Butler, the Bulldogs won 53 games and advanced to the Sweet 16 of the 2003 NCAA Tournament.

As a player, Graves lettered four years at Butler and was part of a program that posted a 95-54 (63.8%) mark while he was in school. He was team captain each of his final two seasons, when the Bulldogs went 23-10 and 22-11, respectively, after winning the Midwestern Collegiate Conference Tournament title and advancing to the NCAA Tournament. Graves was the third-leading scorer on the team in 1996-97 when Butler made its first NCAA Tournament appearance in 35 years, while as a senior he was chosen the squad's most valuable player and was named to the MCC all-tournament team after recording 18 points in the championship contest.

He scored 994 points during his career, and still ranks among the top 10 in school history with 175 three-point field goals and an 84.6 free-throw percentage. Graves' 42 points his senior year against Cleveland State is the fifth-highest total in a game in Bulldog history.

Off the court, he was named to the GTE Academic All-District V team his final year and was also an academic all-league selection.

Graves earned his bachelor's degree from Butler in education (chemistry) in 1998 and his master's degree from the school in 2003 in education administration. He and his wife Susan have two daughters, Abigail and Lillian.

## The Graves Ledger

## THE LAST TIME...

### Individual

**A player scored 40 points:** Junie Lewis (41) vs. VCU (1/30/88)  
**A player scored 30 points:** Rodrick Sikes (31) vs. Georgia State (12/29/17)  
**A player made 15 field goals:** Junie Lewis (15) vs. VCU (1/30/88)  
**A player made 8 three-pointers:** Freddie Goldstein (9) at ULM (2/11/12)  
**A player made 11 free throws:** Georgi Boyanov (13) vs. UTA (1/16/16)  
**A player grabbed 20 rebounds:** Terry Catledge (26) vs. UNC Charlotte (1/20/85)  
**A player dished out 10 assists:** Daon Merritt (13) at Troy (2/10/08)  
**A player blocked 7 shots:** Javier Carter (7) vs. William Carey (11/14/12)  
**A player had 7 steals:** Demetric Bennett (7) vs. Texas College (12/19/06)  
**A player made a shot in the last 5 seconds to win:** Ken Williams (0.8, 3 ptr, W 73-70) vs. Arkansas State (3/4/17)  
**An opponent made a shot in the last 5 seconds to win:** Chris Harrison-Docks (4.3, 2 ptr, L 56-58 vs. Western Kentucky (1/2/14)

### Team - Offense

**Scored 100+ points:** 104-95 vs. Appalachian State (1/8/15)  
**Scored 90-99 points:** 96-91 vs. Troy (3/7/15)  
**Scored 50 or fewer:** 50-75 at Texas Tech (11/10/17)  
**Scored 90 or more and lost:** 93-96 at Rice 3OT (12/7/13)  
**Scored 90 or more in regulation and lost:** 96-103 vs. New Orleans (2/5/95)  
**Scored 55 or fewer and won:** 55-52 vs. New Orleans (11/26/17)  
**Made 45 field goals:** 48 vs. William Carey (2/25/03)  
**Shot 60% from the floor:** 61.2% (30-49) vs. Appalachian State (1/8/15)  
**Shot 70% from the floor in a half:** 73.9% vs. Florida Atlantic (2/14/09)  
**Shot less than 30% from the floor:** 29.4% at Little Rock (2/6/16)  
**Shot less than 20% from the floor:** 18.5% at Southern Miss (11/17/10)  
**Made 11 three-pointers:** 12 vs. Georgia State (12/29/17)  
**Made 35 free throws:** 37 vs. New Orleans (3/9/08)  
**Grabbed 60 rebounds:** 61 vs. Florida International (2/11/10)  
**Recorded 15 or more steals:** 20 vs. Texas College (12/19/06)  
**Recorded 25 or more assists:** 26 vs. Florida Atlantic (2/14/09)  
**Blocked 10 or more shots:** 11 vs. Mobile (11/13/17)  
**Had fewer than 10 turnovers:** 8 at Tulane (12/21/17)  
**Did not make a 3-pointer:** 0-24 at Florida State (11/20/11)  
**Shot less than 10% on 3-pointers:** 6.7% (1-15) at Louisiana (2/13/17)  
**Shot 90% from the free throw line:** 93.8% (15-16) vs. North Texas (2/23/13)  
**Shot less than 50% from the free throw line:** 44.8% (13-29) vs. Blue Mountain (11/14/16)  
**Had six players score in double figures:** 6 vs. Appalachian State (1/8/15); Williams-26, Ferguson-19, Boyanov-17, Johnson-15, Lewis-11, Stevens-10  
**Had zero players score in double figures:** at Little Rock (2/6/16)  
**Had two 20-point scorers:** Rodrick Sikes (32) and Josh Ajayi (20) vs. Stetson (11/22/17)  
**Two players had a double-double:** Augustine Rubit (12p-14r) and Mychal Ammons (20p-11r) at Western Kentucky (2/15/14)

### Team - Defense

**Held a team to 39 or fewer:** 88-35 vs. Blue Mountain (11/14/16)  
**Had an opponent score 100 or more:** 100-68 at ULM (1/23/16)  
**Had an opponent shoot 70% or better in a half:** 73.7% (14-19) vs. Little Rock (3/2/17)  
**Held an opponent to less than 30% from the field:** 20.0% (10-50) vs. Blue Mountain (11/14/16)  
**Held an opponent to less than 20% from the field in a half:** 16.7% (4-24) vs. Blue Mountain (11/14/16)  
**Held an opponent to less than 10% 3-point FG's:** 6.3% (1-16) vs. Spring Hill (12/19/16)

### Team - Miscellaneous

**Won a game by 25 points or more:** 53 (88-35) vs. Blue Mountain (11/14/16)  
**Lost a game by 25 points or more:** 29 (58-87) at Florida International (12/2/17)  
**Won a game when trailing by 10 or more:** 12, 58-46 (13:46, 2nd) vs. Arkansas State (3/4/17)  
**Lost a game when leading by 10 or more:** 16, 39-23 (0:20, 1st) vs. Coastal Carolina (2/20/17)  
**Lost a game when leading by 10 or more in 2nd half:** 14, 32-18 (18:38) vs. Little Rock (3/2/17)  
**Played an overtime game:** L 77-81 vs. Stetson (11/22/17)  
**Played in a multiple-overtime game:** W 72-70 2OT at Samford (12/18/15)  
**Won an overtime game:** 72-67 vs. Texas State (1/14/17)  
**Lost an overtime game:** 77-81 vs. Stetson (11/22/17)

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   | |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |  |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                          |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |  |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |  |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |  |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |  |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |  |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |  |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   | |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |  |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |  |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |  |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |  |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |     |       |      |       |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |      |     |     |   |    |    |    |    |    |    |       |    |      |     |     |    |   |   |   |   |   |   |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |    |          |    |      |     |     |   |   |   |   |   |   |   |          |    |     |     |     |   |   |   |   |   |   |   |       |    |      |     |     |   |   |   |   |   |   |    |            |    |     |     |     |   |   |   |   |   |   |   |        |   |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |   |  |  |  |        |     |       |      |       |    |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |  |    |    |    |   |   |    |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |    |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |    |           |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |        |    |      |     |     |   |   |   |   |   |   |    |          |    |     |     |     |   |   |   |   |   |   |   |        |    |     |     |     |   |   |   |   |   |   |   |         |    |     |     |     |   |   |   |   |   |   |   |      |  |  |  |  |   |  |  |  |  |  |  |        |     |       |       |       |    |    |    |    |   |   |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |     |    |   |    |    |    |    |    |    |        |    |     |     |     |   |   |   |   |   |   |   |        |    |      |     |     |   |   |   |   |   |   |    |           |    | ## 2017-18 Notes

- Dished out a season-best six assists against one turnover vs. Georgia State (12/29)
- Tied his career high with nine points on three 3-pointers at Florida International (12/2)
- Scored seven of his eight points in a 33-second stretch in the second half to spark rally vs. New Orleans (11/26)
- Set new season high with five assists vs. Stetson (11/22)
- Dished out four assists with just one turnover vs. Mobile (11/13)
- Came off the bench to hit both 3-point attempts for six points at Texas Tech (11/10)

## 2016-17 Notes

- Recorded a pair of steals for the third time in four games and dished out three assists vs. Little Rock (3/2)
- Posted all seven points from the foul line after going 7 for 8 — career highs in both categories — at Texas State (2/20)
- Scored seven points — tied for his second-most of the season — on two 3-pointers and had three assists and no turnovers at UTA (2/25)
- Dished out three assists with no turnovers vs. Appalachian State (2/18)
- Hit two of his three 3-point attempts for six points, and added six assists and two steals at ULM (2/11)
- Recorded season-high eight points — going 3 for 4 from the floor and 2 for 2 from 3-point land — and dished out four assists with two steals at Little Rock (1/21)
- Set new career highs in assists (7), rebounds (6) and blocks (2), to go along with six points vs. UTA (1/16)
- Hit both of his 3-point attempts and dished out four assists at Georgia State (1/7)
- Gave out team-best three assists at Ole Miss (12/22) and added three points
- Tied his season high of four assists for the second time in three games vs. Samford (12/16)
- Set a new season high with seven points and tied his season best with four assists with no turnovers at Stetson (12/10)
- Handed out a team-high four assists at Eastern Illinois (11/26)
- Hit a pair of 3-pointers and dished out four assists vs. Blue Mountain (11/14)
- Dished out three assists with no turnovers in start at UNLV (11/11)
- Started in exhibition vs. Mobile (11/4), scored eight points — on two 3-pointers — and had three assists in 15 minutes of work

## 2017-18 Notes

- Went 5 for 10 from deep and 8 for 9 from the stripe for a game-high 27 points vs. Georgia Southern (12/31)
- Became first Jaguar to score 30-plus points in back-to-back games since 1984 with 31 vs. Georgia State (12/29); went 6 for 10 from 3-point land and 5 for 6 from the line
- Scored a career-best 34 points — 23 in the second half alone — on six 3-pointers at Tulane (12/21)
- Credited with three steals to tie his career high vs. Eastern Illinois (12/16)
- Tied career high with three steals at SIU Edwardsville (12/10)
- Led the team with 20 points vs. Southern Miss (11/29)
- Hit game-winning shot with 18.5 seconds left and scored a game-high 15 points vs. New Orleans (11/26)
- Became the first USA player to score over 30 points in four years with 32 vs. Stetson (11/22), after shooting 7 for 13 from 3-point land, including the game-tying triple with 2.8 seconds left
- Named to Naismith Tip-Off All-Tournament team after leading all players with 13 points and pulling down a career-high six rebounds vs. Saint Peter's (11/19)
- Went 6 for 13 from the floor and 3 for 8 from 3-point land for the second straight game vs. Maine (11/18), totaling 15 points
- Went 6 for 13 from the floor for a career high 17 points at La Salle (11/16)
- Scored 12 points off the bench and had two blocks vs. Mobile (11/13)
- Scored all four points at Texas Tech (11/10) from the free-throw line and added three steals
- Recorded a game-high 25 points off the bench in exhibition vs. North Alabama
- Scored team-high 20 points in the Jaguars' exhibition win over Spring Hill

# Jordan Andrews

#25

Guard

Sophomore

6-4 • 180

Abita Springs, La. (Youngstown State/Riverside Academy)

## 2017-18 Notes

- Tied career high with six rebounds vs. Georgia Southern (12/31)
- Came off the bench to pour in 19 points on five treys vs. Georgia State (12/29), and added three steals for the second straight game
- Broke three-game scoring drought at SIU Edwardsville (12/10) with 15 points, his most since Nov. 16 at La Salle
- Had consecutive free throw streak snapped at 28 but still had 11 points vs. Saint Peter's (11/19)
- Held to season-low 10 points vs. Maine (11/18) but set new career high with five assists and made all five free-throw attempts
- Scored 18 of his career-high 20 points in the second half at La Salle (11/16)
- Led all scorers with 18 points on three 3-pointers vs. Mobile (11/13)
- Went 7 for 7 from the free-throw line for game-high 15 points at Texas Tech (11/10)

## 2016-17 Notes

- Sat out season due to NCAA transfer rules

## 2015-16 Notes

- Named to Horizon League all-Freshman team after setting school freshman record with 50 3-pointers

## 2017-18 Notes

- ▶ Tallied third double-double of the year with 16 points and 10 rebounds vs. Georgia State (12/29)
- ▶ Recorded 17 points on 8-of-15 shooting at Tulane (12/21)
- ▶ Scored a team-high 16 points and grabbed seven rebounds at Florida International (12/2)
- ▶ Notched second double-double with season highs in points (20) and rebounds (11) vs. Stetson (11/22), and added career-high-tying four assists
- ▶ Named to Naismith Tip-Off All-Tournament team
- ▶ Led all scorers with 18 points vs. Maine (11/18)
- ▶ Recorded first double-double of the season with 12 points and 10 rebounds vs. Mobile (11/13)
- ▶ Scored 17 points with nine rebounds in exhibition vs. North Alabama

## 2016-17 Notes

- ▶ Set new career high with two blocks and went 4 for 5 from the floor for 14 points vs. Little Rock (3/2)
- ▶ Made all three 3-point attempts for 16 points vs. Appalachian State (2/18)
- ▶ Pulled down double-digit rebounds (10) for the second straight game at Louisiana (2/13)
- ▶ Recorded third double-double of the year with 13 points and 11 rebounds at ULM (2/11)
- ▶ Tallied 13 points and shared team-high honors with eight rebounds vs. Georgia Southern (1/28)
- ▶ Had 17 points — on 3-for-4 shooting from 3-point land — and five rebounds at Arkansas State (1/23)
- ▶ Led the Jaguars with 16 points on 7-for-12 shooting vs. UTA (1/16)
- ▶ Extended double-digit scoring streak to four with 10 points vs. Texas State (1/14)
- ▶ Set new career highs in rebounds (13), free throws made (9) and assists (4) at Georgia Southern (1/9)
- ▶ Converted eight times in 12 attempts from the floor and grabbed seven boards at Georgia State (1/7)
- ▶ Recorded 14 points and team-best eight rebounds vs. Troy (1/2)
- ▶ Made five of his eight attempts from the floor for 13 vs. Spring Hill (12/19)
- ▶ Scored 10 points for the second straight game vs. Samford (12/16), hitting all three field-goal attempts
- ▶ Enjoyed best game in almost a month at Stetson (12/10), scoring 10 points — on two 3-pointers — with eight rebounds
- ▶ Recorded three steals at Eastern Illinois (11/26)
- ▶ Set new career highs with 27 points — the most by a USA freshman in Mitchell Center history — and 10 rebounds, and recorded game-tying tip-in with 5.8 left in regulation vs. Florida International (11/18)
- ▶ Made all four shots from the floor and pulled down five rebounds vs. Blue Mountain (11/14)
- ▶ Eight points on 4-for-7 shooting in start vs. Mobile (11/4)

## 2015-16 Notes

- ▶ Redshirted

## 2017-18 Double Doubles (3)

- 16 pts, 10 rebs vs. Georgia State (12/29)
- 20 pts, 11 rebs vs. Stetson (11/22)
- 12 pts, 10 rebs vs. Mobile (11/13)

## 2016-17 Double Doubles (3)

- 13 pts, 11 rebs at ULM (2/11)
- 19 pts, 13 rebs at Georgia Southern (1/9)
- 27 pts, 10 rebs vs. Florida International (11/18)

Austell, Ga. (Pebblebrook HS)

## 2017-18 Notes

- Tied career high with nine rebounds vs. Georgia State (12/29), and added three blocks and two steals
- Made all four shots from the floor, set new career highs with nine rebounds and seven assists, and tied his personal best with four blocks vs. Eastern Illinois (12/16)
- Tied career high with eight rebounds at SIU Edwardsville (12/10)
- Set new career high with eight rebounds vs. Stetson (11/22)
- Tied his career high in rebounds for the third time this season with seven vs. Saint Peter's (11/19)
- Scored 11 points vs. Maine (11/18), and added career-high-tying seven rebounds, five assists, a personal best three steals, and two blocks
- Led the Jaguars with six rebounds at La Salle (11/16)
- Tied career high with seven rebounds and set new personal best with six assists vs. Mobile (11/13)
- Pulled down a game-high six rebounds at Texas Tech (11/10)

## 2016-17 Notes

- Grabbed a team-high six rebounds — one shy of his career best — and had two blocks and steals apiece vs. Little Rock (3/2)
- Made all three shots and set new career high with four blocks at Texas State (2/20)
- Recorded double-digit points for second straight game with 11 points on 4-for-4 shooting at UTA (2/25)
- Posted new career high with 13 points on 5-for-6 shooting and tied personal best with three blocks vs. Coastal Carolina (2/20)
- Poured in eight points and grabbed four rebounds at ULM (2/11)
- Made all four shots from the floor for nine points, and blocked a pair of shots at Troy (2/4)
- Set a new career high with five assists and added six rebounds vs. Georgia State (1/30)
- Scored seven points on 2-for-3 shooting from the floor, and set a new career high with three blocks vs. Georgia Southern (1/28)
- Earned first career start at Arkansas State (1/23), playing a career-high 28 minutes with five points, three rebounds and two assists and blocks each
- Tied career high with two assists at Ole Miss (12/22)
- Scored 10 points and grabbed seven rebounds in 17 minutes of work vs. Blue Mountain (11/14)
- Eight points on 4-for-4 shooting from the floor, and had five rebounds, three steals and two assists in exhibition vs. Mobile (11/4)

## 2015-16 Notes
