WHY FLOSPORTS?

With the launch of this comprehensive partnership, the GSC joins other innovative NCAA Division I and Division II conferences in the distribution of their entire football season and Conference Championships on a digital-only, OTT platform. Fans will be able to watch live and on-demand games, and other content, on any device at any time.

PARTNERSHIP BENEFITS

In this partnership, the Gulf South and the FloSports team will collaborate on a new weekly studio show that will be dedicated to news, interviews, features on student-athletes and analysis on the conference's football programs throughout the season.

Through the support of FloSports, the conference's sports outside of football will have amplified coverage. For example, in 2020-21, the GSC Cross Country, Indoor Track & Field, and Outdoor Track & Field Championships were live streamed for the first time in league history.
