

CAPABILITY STATEMENT

SIGNAL ENERGY[®]
AUSTRALIA PTY LTD

WE HARNESS **CREATIVE** ENERGY

WHO IS SIGNAL ENERGY AUSTRALIA?

Signal Energy Australia (SEA) is a respected and innovative Engineering, Procurement, Construction and Consulting (EPCC) company in the large-scale renewable energy industry.

Established in Australia in Dec 2017, SEA has built a reputation as a trusted partner based upon its principles driven approach to business and its high-quality construction work. SEA has successfully built and operated multiple utility scale solar farms in Australia.

WHY ENGAGE WITH SEA?

SEA has expertise and experience in the areas that will drive success in your development, namely:

- Grid Connection
- PV Design & Optimisation
- Stakeholder Management and
- Project Management.

Relationships are key to the way SEA does business. We place the highest importance on Stakeholder engagement, and as a result we are able to build robust & effective relationships that when paired with our Project Management expertise allow us to achieve first-rate results and avoid the lengthy delays and pitfalls that befall less experienced Engineering, Procurement & Construction (EPC) organisations in the Australian Electricity Market.

SEA looks forward to working with you to achieve your project goals in a positive and collaborative manner.

WE CARE, COLLABORATE & SUCCEED

CONSULTING SERVICES

No matter where you are in the lifecycle of your solar farm, from project initiation through to completion, SEA can provide valued professional services at any stage.

The earlier SEA is engaged in the project development, the more value SEA can add through project optimization and services. Click [here](#) to learn more or request the SEA EPCC consulting brochure.

SAFETY & COMMUNITY

SEA genuinely care and are committed to the health and safety of personnel and a sustainable future for all. SEA takes a proactive approach to health and safety, especially regarding awareness and management of hazards that align to our construction activities.

SEA pride ourselves on consistent communication and consultation with our workforce. This caring and consultative approach guarantees we build a culture of trust and respect to ensure the safety of all personnel involved or impacted by our projects. To extend this caring approach to the community in which we work and live, SEA have developed the "Signal Cares Program." This program is an employee-led initiative that ensures we leave things better than we found them. Working through community organisations and agencies, we identify and execute projects that service the needs of the communities where we work.

To further bring together our genuine care for our people and the community, SEA is committed to a sustainable future with key sustainability targets set and monitored to ensure we deliver on the triple bottom line of environmental, social, and economic outcomes that will benefit the communities we work in for our delivery partners and SEA.

FINANCIAL STABILITY

SEA has earned a reputation for designing and delivering the best solution for our clients through innovative design. We are focused on delivering the lowest cost of energy, excellence in planning and execution of solar energy infrastructure projects.

Our team thinks outside the box to come up with creative solutions that meet tomorrow's energy needs. Signal Energy Australia follows sound business principles, resulting in a solid reputation and recognition as one of the best, most capable and trusted EPCC constructors in Australia.

It's financial strength has been further strengthened by the recent purchase of Signal Energy LLC by Oaktree Capital,  **OAKTREE** a venture capital company based in California, USA with over US\$3 Billion in equity capital invested in the energy & power industries sector.

Signal Energy Australia has rock solid financial strength and the ability to bond any size renewable energy or infrastructure project.

WHAT OUR CLIENTS SAY

MATTHEW ROSE

Head of Projects Wirsol Energy Pty Ltd

"Signal Energy Australia did an exemplary job as the EPC on Wirtgen Invest's 149MW Glenrowan West Solar Farm. They delivered a high quality, well-engineered design and through extensive project management expertise, executed extremely well, particularly in such challenging times with many COVID hurdles to navigate. They proved their expertise and experience in grid connection, commissioning and hold point testing by finalising hold point testing in record time. Signal Energy's ability to work closely with AEMO and AusNet was certainly a key reason for the success and further strengthens their ability to deliver good quality projects on time. We built a strong relationship in what was a hugely successful project and would have no hesitation in working with them again in our future projects."

SÖNKE VOIGT

Head of Energy Wirtgen Invest Holding

"As the investor for the 149MW Glenrowan West Solar Farm in Victoria, we were delighted at how well the project was managed, constructed and commissioned. Signal Energy Australia collaborated extremely well with our local teams and above all delivered the project with maximum efficiency and still highest quality through COVID-19 and most critically - on time. We would highly recommend Signal Energy Australia to any other potential financial investor as a way to ensure high quality results being achieved within time and budget."

IAIN POPE

Investment Manager John Laing

"During the construction of the Finley Solar Farm we found that Signal Energy Australia has an experienced local team with the capability to deliver a complex project to a high quality. As an investor in infrastructure projects John Laing is always looking for good partners to work with and we found that the Signal team was a good match for us in terms of our active approach to asset management. We enjoy a good relationship with the management team both here in Australia and in the US allowing us to work through challenging issues in a constructive manner."

making infrastructure happen

PIERS KLUGMAN

Head of Project Delivery Esco Pacific

"Signal Energy Australia proved themselves to be highly capable during the construction of Finley Solar Farm. Faced with an extremely ambitious schedule, Signal were able to complete the civil, mechanical and electrical design, procurement and installation in record time, whilst maintaining high quality standards. Signal always conducted themselves ethically and I have every confidence in their ability to continue to deliver high quality projects throughout Australia."
