

Motiondeck™

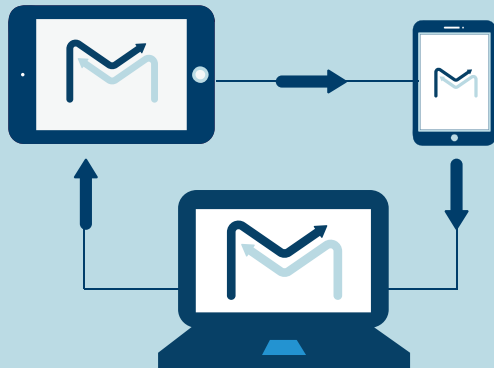

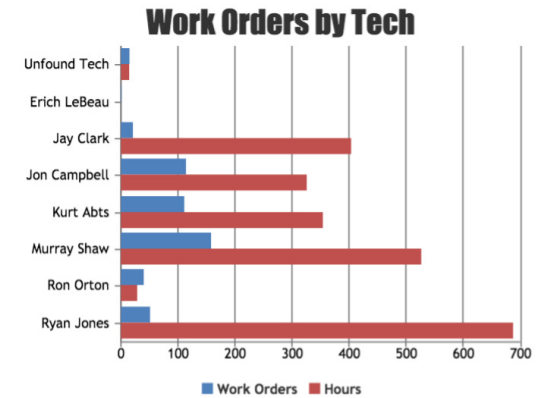

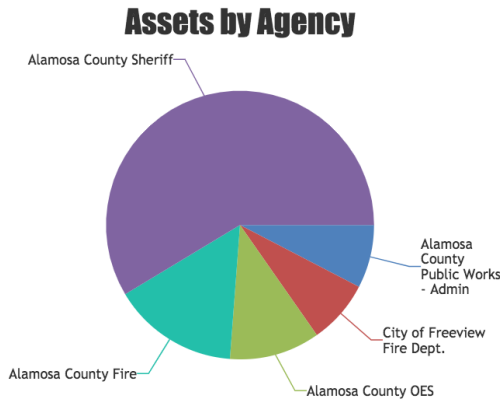

A powerful **NEW** platform from the developers of Commshop

Mcmtechnology develops **best in class asset management software solutions** helping our customers track, manage, and maintain their complex asset inventory.

The **Motiondeck** platform is a powerful software tool used to create feature-rich, web-based applications with enterprise capability. Highly configurable and flexible, **Motiondeck** powers Mcmtech's asset management portfolio providing solutions for radio communications, public safety, transportation, utilities, IT, telecommunications, and enterprise customers. **—————> get more.**

more features

All solutions powered by Motiondeck include **automatic alerting & configurable dashboards** as standard features!

more choices

With Motiondeck, you choose! All of our solutions can be cloud-based or on-premise on your own private network. Users have more flexibility with streamlined communications and the ability to access information more easily since all solutions powered by the Motiondeck platform are compatible with Windows, Android, and iOS devices using a web browser.

more benefits

- Enhancing user experience with new features like **customizable dashboards**
- **Improving workflow processes** by expediting communications
- Increasing efficiencies with more **automated alerts**
- **Reducing maintenance turnaround time** by allowing technicians to make updates in the field
- Improving customer service by giving end users access to **view their data** and **submit online requests**
