

Backup of Specifi[®] files and folders before installing the update

Method A (automatic):

1. Download one of the following utilities from Specifi website:

<https://s3.us-east-2.amazonaws.com/static.specifiglobal.com/applications/SpecifiBackup.bat>

<https://s3.us-east-2.amazonaws.com/static.specifiglobal.com/applications/SpecifiBackup.exe>

*Please note that some antivirus suites will block downloads of bat files or will ask for the user confirmation.

2. Please be sure you have free space on drive C: and run backup utility. The backups will be available in the C: drive "Backup" folder.
3. Run SpecifiSuite.exe and install the new software version

Method B (manually):

1. Create a folder called "Backup"
2. Copy the following files and folders from the original path to the new folder "Backup" just created.
To navigate to the exact location just copy and paste the following folders into your File Explorer:

%Public%\Roaming\SpecifiGlobal\Specifi

%localappdata%\SpecifiGlobal\Specifi

%programfiles(x86)%\Specifi

3. Run SpecifiSuite.exe and install the new software version
