For the avoidance of doubt, any extension pursuant to these Terms and Conditions shall not affect the obligation of Token Generator and Purchaser to make and take delivery, respectively, of Tokens purchased.

- 2.10 In the event Token Generator decides to not complete the Token Sale, the Purchase Price will be returned to Purchaser by Token Generator, less all reasonable transaction costs incurred by Token Generator during the Token Sale. All cryptocurrencies submitted by Purchaser will be returned to Purchaser Receiving Address used to originally send such cryptocurrency. Purchaser purchase of Tokens during the Token Sale is final. Purchaser cannot cancel the purchase and Purchaser's purchase cannot be refunded, except as provided in these Terms and Conditions or as may be required by applicable law.

2 DISCLOSURE SCHEDULE

The acquisition of Tokens involves a high degree of risk. Before acquiring Tokens, it is recommended that each Purchaser conduct its own careful examination of all relevant information and risks about the Token Generator, Platform and Tokens and, specifically, the disclosures and risk factors set out below. If any of the following risks actually occurs, the Platform, Token and Purchaser's Tokens may be materially and adversely affected, including the Purchaser's Token being rendered worthless or unusable.

4 Disclosures regarding Tokens

4.1 Nature of Tokens

- (a) Token is a utility token

Tokens are digital utility tokens that afford Token holders to access the Platform and/or execute certain functions on the Token Smart Contract in accordance with the terms of an open-source license agreement further described on the Swapy website referenced in the White Paper (**Website**). Tokens do not represent a loan to Token Generator nor do they provide Purchaser with any ownership or other interest in or to Token Generator. For greater certainty, the purchase of Tokens does not provide Purchaser with any form of ownership right or other interest in or to Token Generator or its present or future assets and revenues, including, but not limited to, any voting, distribution, redemption, liquidation, revenue sharing, proprietary (including all forms of intellectual property), or other financial or legal rights.

4.2 Tokens are non-refundable

Other than instances described in the Terms and Conditions, Token Generator is not obliged to provide Token holders with a refund for any reason, and Token holders will not receive money or other compensation in lieu of a refund. Statements set out in the White Paper are merely expressions of the Token Generator's objectives and desired work plan to achieve those objectives. and no

promises of future performance or price are or will be made in respect to Tokens, including no promise of inherent value and no guarantee that Tokens will hold any particular value.

4.3 Tokens are provided on an "as is" basis

Tokens are provided on "as is" basis. The Token Generator Parties and each of their respective directors, officers, employees, shareholders, affiliates and licensors make no representations or warranties of any kind, whether express, implied, statutory or otherwise regarding Tokens, including any warranty of title, merchantability or fitness for a particular purpose or any warranty that Tokens and Platform will be uninterrupted, error-free or free of harmful components, secure or not otherwise lost or damaged. Except to the extent prohibited by applicable law, the Token Generator Parties and each of their respective directors, officers, employees, shareholders, affiliates and licensors disclaim all warranties, including any implied warranties of merchantability, satisfactory quality, fitness for a particular purpose, non-infringement, or quiet enjoyment, and any warranties arising out of any course of dealings, usage or trade.

4.4 Not an offering of securities, commodities or swaps

The sale of Tokens and Tokens themselves are not securities, commodities, swaps on either securities or commodities, or a financial instrument of any kind. Purchases and sales of Tokens are not subject to the protections of any laws governing those types of financial instruments. This White Paper and all other documents referred to in this White Paper including the Terms and Conditions do not constitute a prospectus or offering document, and are not an offer to sell, nor the solicitation of an offer to buy an investment, a security, commodity, or a swap on either a security or commodity.

4.5 Non-Investment purposes

Purchaser acknowledges and agrees that Purchaser is not purchasing Tokens for purposes of investment, speculation, as some type of arbitrage strategy, for immediate resale or other financial purposes. Tokens are not designed for investment purposes and should not be considered as a type of investment.

4.6 Force majeure

The Token Generation and the performance of the Token Generator's activities set out in White Paper development roadmap may be interrupted, suspended or delayed due to force majeure events. For the purposes of this White Paper, a force majeure event shall mean any extraordinary event or circumstances which could not be prevented by Token Generator and shall include: hardware, software or other utility failures, changes in market forces or technology, software or smart contract bugs, changes in blockchain-related protocols, acts of nature, wars, armed conflicts, mass civil disorders, industrial actions, epidemics, lockouts, slowdowns, prolonged shortage or other failures of energy supplies or communication service, acts of municipal, state or federal governmental agencies or other circumstances beyond Token Generator's control, which were not in existence at the time of Token Generation. Purchaser understands and agrees that Token Generator shall not be liable and disclaims all liability to Purchaser in connection with a force majeure event.

4.7 Insurance

Unlike bank accounts or accounts at financial institutions, Tokens are uninsured unless you specifically obtain private insurance to insure them. Thus, in the event of loss or loss of utility value, there is no public insurer or private insurance arranged by Token Generator to offer recourse to Purchaser.

5 Governmental disclosures

5.1 Risk of unfavorable regulatory action in one or more jurisdictions

The regulatory status of cryptographic tokens, digital assets, and blockchain technology is undeveloped, varies significantly among jurisdictions and is subject to significant uncertainty. It is possible that certain jurisdictions may adopt laws, regulations, policies or rules directly or indirectly affecting the Ethereum network, or restricting the right to acquire, own, hold, sell, convert, trade, or use Tokens. Developments in laws, regulations, policies or rules may alter the nature of the operation of the blockchain network upon which Tokens are dependent.

There can be no assurance that governmental authorities will not examine the operations of Token Generator Parties and/or pursue enforcement actions against Token Generator Parties. All of this may subject Token Generator Parties to judgments, settlements, fines or penalties, or cause Token Generator Parties to restructure their operations and activities or to cease offering certain products or services, all of which could harm Token Generator Parties's reputation or lead to higher operational costs, which may, in turn, have a material adverse effect on Tokens and/or the development of the Platform.

5.2 Purchaser bears responsibility of legal categorisation

There is a risk that Tokens might be considered a security in certain jurisdictions, or that they might be considered to be a security in the future. The Token Generator does not provide any warranty or guarantee as to whether Tokens will be a security in the jurisdiction of the Purchaser. Each Purchaser will bear all consequences of Tokens being considered a security in their respective jurisdiction. Every Purchaser is responsible to confirm if the acquisition and/or disposal of Tokens is legal in its relevant jurisdiction, and by accepting Terms and Conditions each Purchaser undertakes not to use Tokens in any jurisdiction where doing so would be unlawful. If a Purchaser establishes that the purchase or use of Tokens is not legal in its jurisdiction, it should not acquire Tokens and immediately stop using or possessing Tokens.

Acquiring Tokens in exchange for cryptocurrency will most likely continue to be scrutinized by various regulatory bodies around the world, which may impact the usage of Tokens. The legal ability of the Token Generator to provide or support Tokens in some jurisdictions may be eliminated by future regulation or legal actions. In the event the Token Generator or Credit Dream, Inc. determines that the purchase or usage of Tokens is illegal in a certain jurisdiction, the Token Generator or Credit Dream, Inc. may cease operations in that jurisdiction, or adjust Tokens or the Platform in a way to comply with applicable law.

5.3 Purchaser bears responsibility for complying with transfer restrictions

Tokens may be placed on third-party exchanges, giving future purchasers and users an opportunity to openly buy Tokens. A user seeking to enter the Platform following the Token Generation will have to buy Tokens on such exchanges. Conversely, Tokens may be sold on such exchanges if the holder of Tokens would like to exit the Platform. Existing laws on the circulation of securities in certain countries, such as the United States of America, Canada and Singapore, may prohibit the sale of Tokens to the residents of those countries. When buying Tokens, Purchaser should be aware of the restrictions on their subsequent sale.

6 General security risks

6.1 Risk of theft and hacking

Token generation events and initial coin offerings are often targeted by hackers and bad actors. Hackers may attempt to interfere with the Purchaser's digital wallet, the Token Smart Contract or the availability of Tokens in any number of ways, including without limitation denial of service attacks, Sybil attacks, spoofing, smurfing, malware attacks, or consensus-based attacks. Any such attack may result in theft of Purchaser's Tokens.

6.2 Private keys

Tokens purchased by Purchaser may be held by Purchaser in Purchaser's digital wallet or vault, which requires a private key, or a combination of private keys, for access. Accordingly, loss of requisite private key(s) associated with Purchaser's digital wallet or vault storing Tokens will result in loss of such Tokens. Moreover, any third party that gains access to such private key(s), including by gaining access to login credentials of a hosted wallet or vault service Purchaser uses, may be able to misappropriate Purchaser's Tokens. Token Generator is not responsible for any such losses.

6.3 Failure to map a public key to Purchaser's wallet

Failure of the Purchaser to map a public key to such Purchaser's digital wallet may result in third-parties being unable to recognize buyer's Token balance on the Ethereum blockchain when and if they configure the initial balances of a new blockchain based upon the Platform.

6.4 Exchange risks

If Purchaser sends Ether to the Token Generator from an exchange or an account that Purchaser does not control, Tokens will be allocated to the account that has sent Ether; therefore, Purchaser may never receive or be able to recover Purchaser's Tokens. Furthermore, if Purchaser chooses to maintain or hold Tokens through a cryptocurrency exchange or other third party, Purchaser's Tokens may be stolen or lost.

6.5 Risk of incompatible wallet services

The wallet or wallet service provider used for the acquisition and storage of Tokens has to be technically compatible with Tokens. The failure to assure this may result in the Purchaser not being able to gain access to its Tokens.

6.6 Risk of weaknesses or exploitable breakthroughs in the field of cryptography

Advances in cryptography, or other technical advances such as the development of quantum computers, could present risks to cryptocurrencies, Ethereum and Tokens, which could result in the theft or loss of Tokens.

6.7 Internet transmission risks

There are risks associated with using Tokens including, but not limited to, the failure of hardware, software, and internet connections. The Token Generator shall not be responsible for any communication failures, disruptions, errors, distortions or delays you may experience when using the Platform and Tokens, howsoever caused. Transactions in cryptocurrency may be irreversible, and, accordingly, losses due to fraudulent or accidental transactions may not be recoverable. cryptocurrency transactions are deemed to be made when recorded on a public ledger, which is not necessarily the date or time when the transaction is initiated.

7 Platform disclosures

7.1 No guarantee that Token Smart Contract will be developed

Purchaser acknowledges, understands and agrees that Purchaser should not expect and there is no guarantee or representation or warranty by Token Generator that: (a) the Platform will ever be adopted; (b) the Platform will be adopted as developed by Token Generator and not in a different or modified form; (c) a blockchain utilizing or adopting the Token Generator will ever be launched; and (d) a blockchain will ever be launched with or without changes to the Platform. Furthermore, the tokens issued by Token Generator initially (**Initial Tokens**) will not have any functionality or rights on the Platform and holding Initial Tokens is not a guarantee, representation or warranty that the holder will be able to use the Platform, or receive any tokens utilized on the Platform, even if the Platform is launched and the Token Smart Contract is adopted, of which there is no guarantee, representation or warranty made by Token Generator.

7.2 Risks associated with the Token Smart Contract and associated software and/or infrastructure.

(a) Malfunctions

The Token Smart Contract is based on the Ethereum blockchain. As such, any malfunction, unintended function or unexpected functioning of the Ethereum protocol may cause Tokens and/or the Platform to malfunction or function in an unexpected or unintended manner.

(b) Bugs and weaknesses

The Ethereum blockchain rests on open source software, and accordingly there is the risk that the Token Smart Contract may contain intentional or unintentional bugs or weaknesses which may negatively affect Tokens or result in the loss or theft of Tokens or the loss of ability to access or control Tokens. In the event of such a software bug or weakness, there may be no remedy and Token holders are not guaranteed any remedy, refund or compensation.

(c) Delays and congestions

On the Ethereum blockchain timing of block production is determined by proof of work so block production can occur at random times. For example, Ether contributed to the Token Smart Contract in the final seconds of a distribution period may not get included for that period. Purchaser acknowledges and understands that the Ethereum blockchain may not include the Purchaser's transaction at the time Purchaser expects and Purchaser may not receive Tokens the same day Purchaser sends Ether. The Ethereum blockchain is prone to periodic congestion during which transactions can be delayed or lost. Individuals may also intentionally spam the Ethereum network in an attempt to gain an advantage in purchasing cryptographic tokens. Purchaser acknowledges and understands that Ethereum block producers may not include Purchaser's transaction when Purchaser wants or Purchaser's transaction may not be included at all.

(d) Value of Ether

Ether, the native unit of account of the Ethereum may itself lose value in ways similar to Tokens, and also other ways. More information about Ethereum is available at <http://www.ethereum.org>

7.3 Irreversible nature of blockchain transactions

Transactions involving Tokens that have been verified, and thus recorded as a block on the blockchain, generally cannot be undone. Even if the transaction turns out to have been in error, or due to theft of a user's Token, the transaction is not reversible. Further, at this time, there is no governmental, regulatory, investigative, or prosecutorial authority or mechanism through which to bring an action or complaint regarding missing or stolen Tokens. Consequently, the Token Generator may be unable to replace missing Tokens or seek reimbursement for any erroneous transfer or theft of Tokens.

7.4 Amendments to protocol

The development team and administrators of the source code for Ethereum blockchain or the Token Smart Contract could propose amendments to such network's protocols and software that, if accepted and authorized, or not accepted, by the network community, could adversely affect the supply, security, value, or market share of Tokens.

7.5 Risk of mining attacks

As with other decentralized cryptocurrencies, Ethereum blockchain, which is used for Tokens, is susceptible to mining attacks, including but not limited to double-spend attacks, majority mining power attacks, "selfish-mining" attacks and race condition attacks. Any successful attack presents a

risk to Tokens, including the expected proper execution and sequencing of Tokens and Ethereum contract computations in general. Despite the efforts of the Token Generator and Ethereum Foundation, the risk of known or novel mining attacks exists. Mining attacks, as described above, may also target other blockchain networks, with which Tokens interact with and consequently Tokens may be impacted also in that way to the extent described above.

8 Token Generator disclosures

8.1 Dependence on management team

The ability of the Platform project team, which is responsible for maintaining competitive position of the Platform, is dependent to a large degree on the services of a senior management team. The loss or diminution in the services of members of such senior management team or an inability to attract, retain and maintain additional senior management personnel could have a material adverse effect on the Platform. Competition for personnel with relevant expertise is intense due to the small number of qualified individuals, and this competition may seriously affect the Token Generator's ability to retain its existing senior management and attract additional qualified senior management personnel, which could have a significant adverse impact on the Platform.

8.2 Risks related to reliance on third parties

Even if completed, the Platform will rely, in whole or partly, on third-parties to adopt and implement it and to continue to develop, supply, and otherwise support it. There is no assurance or guarantee that those third-parties will complete their work, properly carry out their obligations, or otherwise meet anyone's needs, any of which might have a material adverse effect on the Platform.

8.3 Insufficient interest in the Platform and Tokens

It is possible that the Platform or Tokens will not be used by a large number of individuals, businesses and organizations and that there will be limited public interest in the creation and development of its functionalities. Such a lack of interest could impact the development of the Platform.

8.4 Platform development risks

The development of the Platform and/or Token Smart Contract may be abandoned for a number of reasons, including lack of interest from the public, insufficient funding, insufficient commercial success or prospects or departure of key personnel.

8.5 Changes to Platform

The Platform is still under development and may undergo significant changes over time. Although Token Generator Parties intend for the Platform to have the features and specifications set forth in this White Paper, changes to such features and specifications may be made for any number of reasons, any of which may mean that the Platform does not meet expectations of the Purchaser.

8.6 Other projects

The Platform may give rise to other, alternative projects, promoted by parties that are affiliated or unaffiliated with the Token Generator Parties, and such projects may provide no benefit to the Platform.

8.7 Disclosures relating to conflicts of interest

Any of the Token Generator Parties may be engaged in transactions with related parties and conflicts of interest may arise, potentially resulting in the conclusion of transactions on terms not determined by market forces.

9 Other disclosures

Purchases of Tokens should be undertaken only by individuals, entities, or companies that have significant experience with, and understanding of, the usage and intricacies of cryptographic tokens, including Ether, and blockchain based software Platforms. Purchaser should have a functional understanding of storage and transmission mechanisms associated with other cryptographic tokens. While the Token Generator will be available to assist purchasers of Tokens during the sale, the Token Generator will not be responsible in any way for loss of BTC, ETH or Tokens resulting from actions taken by, or omitted by purchasers. If you do not have such experience or expertise, then you should not purchase Tokens or participate in the sale of Tokens.

Cryptographic tokens such as Tokens are a new and untested technology. In addition to the risks included above, there are other risks associated with your purchase, possession and use of Tokens, including unanticipated risks. Such risks may further materialize as unanticipated variations or combinations of the risks discussed above.
