

BLACK BELT Q & A c/c -- 06-20-18

Tuesday, June 19, 2018 4:20 PM

Only content planned: neural structures:

- What are they?
- Why are they different?
- Why is that crucial?

2nd/3rd
Wednesdays

"neural structures"

People ask me all the time: what do you do?

~~life coach~~

business / success

TLY

neural programmer

Think of it this way: almost everyone when dealing with an issue creates sentences with critical word choices...

They listen intently to others' sentences and words (what did they mean?)
And then they decide what their response should be...

~~equations~~

journal

Add in feelings (CAN we EVEN control them??)

~~right/wrong~~
are

- Conversations are enacted

- Decisions are made.

- Actions are taken.

- We decide what happened, was it good or bad, and did we like it or not?

IQ/EQ

However, rather than go after the sentences and their words to understand, to influence, and to use or avoid...

Has it occurred to you: there is a neural structure that has been learned, tested, and believed (be it good OR bad)

MOW s/w

...and futzing with the sentences is a long, long reach back to the neural structure itself.

What if... You could... Go after the structure itself?

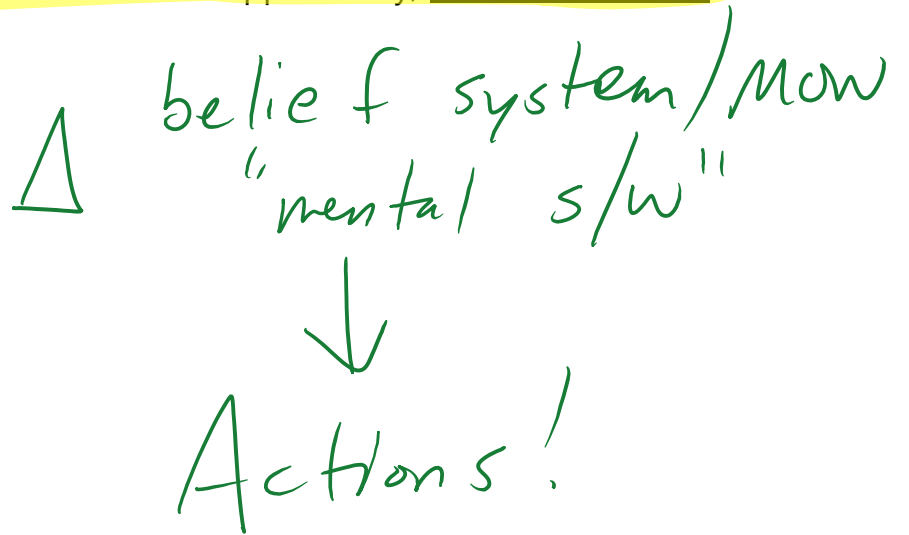

Understand it? 

Change as you wish? 

beliefs ← action/new words
"in the 10"

AND NOW.. new sentences connected to and supported by, the new structures...

ARE GAME CHANGERS!!!

When to do MOW?

1st!
