

### **General questions**

1. What problems can you identify in this story? Are solutions presented?
2. In what way might this story be relevant in your community?

### **Further exploration**

1. There are many pressing health needs in the aftermath of a disaster like an earthquake. How should care for AIDS patients be prioritized in that context?
2. How does the stigma of being HIV positive compound the difficulties facing Haitian patients?
3. Despite the earthquake, extreme poverty and conflict, the HIV infection rate in Haiti has dropped dramatically since the 1990s. What accounts for that success in such dire circumstances?
