

### **General questions**

1. What problems can you identify in this story? Are solutions presented?
2. In what way might this story be relevant in your community?

### **Further exploration**

1. For many Indian women, seeing a doctor is the last resort. What are some of the barriers for women in need of health care?
2. Even in matters of life and death, there's a serious stigma attached to even getting tested for cancer. Why do you think such stigmas exist?
3. Access to cancer treatment is important, but many women lack access to much more basic health care. How should health care providers prioritize what needs they try to meet?
