But the progress - one salvation  
(or not) will be based on the fact  
that we have not yet  
seen the "jump" by which  
"inward by 0.14"

Most of you are at an age when you think for yourselves upon all subjects .....  
and there is often the idea that "science" can prove everything and anything  
and that enough has now been discovered to prove that there is no God. This  
is a complete misunderstanding of the conclusions of science which results  
from incomplete knowledge of the scientific method. As pointed out by Dr.  
Spencer A. Eldier, a research physicist at Johns Hopkins University (Collegiate  
Challenge, March, 1963):

"If you have 'intellectual problems' about the Bible or about the  
person of Jesus Christ, the chances are it is because you know too  
little of God's Word and not because you know too much science."
