SUBJECT: Earlham Heart  
Castle

(for Fruit Acre)

Edel  
7/88

CP

Gen. 7:4 EARTH'S GREATEST CATASTROPHE  
THE FIRST RAIN

I. THE DINOSAUR (dinos barful, tanstok  
minkom  
o'apostigand)

1. Job, after the flood, mentions two other  
descriptive ones  
(1) On the land Job 40:15-24  
(2) In the swamp Job 41:1, 14-16, 19-21, 25-27, 30, 33

2. One roamed all the earth  
tracks, bones, found in all continents  
all sizes, birds, sheep  
large: 90 tons (180,000 pounds)  
: 140' long  
: 100' tall  
Tyrannos Rex

3. The evolutionist says  
lived 70 million years ago

but:  
Inlary River (Ken River) tracks in  
limestone rock, three-foot dinosaurs and  
human being fleeing together to higher  
ground.

of the pulling down of the chronological values  
the evolutionist, millions, millions of years  
BUT: near London, TX, an artifact found in  
the ORDOVICIAN stratum (the second stratum  
in the PALEOZOIC period, 500,000,000 million  
years ago). An iron hammer, clearly man-  
made.  $\frac{1}{2}$  billion years old?

II. WHAT DESTROYED THE DINOSAURS?  
ANSWER: THE FLOOD.

1. Pre-flood world conditions  
a canopy over the earth  
Tropical, lush conditions at the poles,  
and all in between. Greenland &  
tropical paradise.

2. PRUDHOE BAY, northern Alaska. Drilling  
1,400' down, an ancient tropical forest,  
palm trees, ferns, heavy foliage.  
A lake beneath in Arctic, Arctic poles.  
beneath the ice, remains of tropical  
forests.

The atmosphere had far less radiation  
There were fewer somatic, hereditary  
Everyday food, large, strong,  
large - hard creatures.

Vast amounts of food abundant  
enough to feed the great, giant creatures.

Frozen mammoth in Siberia have  
their stomachs full of tropical plants.  
There were herds of these animals in  
the north of Arctic and Antarctic.  
All large mammals were present  
in the past days of N.Y. 217 mammoth carcasses found.  
all died suddenly - in Arctic, Antarctic, and in the

2. What happened?

God punctured the canopy. The water  
above the firmament came down.

The west, the wind, the heat of water -  
rains fell down upon the earth.  
A wall-side deluge of water  
to be reported. Car not seen 40 days,  
night upon the earth - not the sun or  
water - rains in the sky.

It had never rained before the flood  
Apr. 2: 4-6 days  
There was no rainbow before the flood  
Apr. 4: 12-17

THEY: the great change

The original creation was lush, idyllic  
trees were huge - as were the dinosaurs.  
Men lived most periods of time  
there were giants in the earth

1. skeleton of a woman 7' tall
2. Glen Rose - a man 6'4" tall  
found his foot in the limestone foot  
print - the print 4' beyond his heel.
3. Men: 6'4" "giants"

The water-carrying structural  
mentation rate speeded up  
size, strength of animal life declined  
many species ceased to exist

Life - Man & near derived

Wash - 970 feet  
Salat - 433 "  
TERAH - 205 "  
Abraham 179 "

Mean 170 "

Now 10. 90:10 70 years

### III The Massive Catastrophe In The Flood

Animals given way to advisory men  
amounts to food

of a modern elephant eats 300 lbs. of hay  
a day, drinks 30 gals. of water. (But  
carcasses of mammoths found in areas  
where rainfall less than in Sahara desert.  
These mammoths, dinosaurs lived, died  
together.

Oxygen supply diminished. As sudden  
freeze at both poles overtook (from  
tropical to frigid)

Ultra-violet rays from the sun vastly  
increased; no protection by the canopy

These mastodons didn't die out 70  
million year ago - (see the evolutionist) -  
but a great catastrophe destroyed them.  
In the blood, dinosaurs and humans being  
dead together - fleeing to higher ground.

of Blue Rose - the imprint of a human  
hand, full down, fleeing. All the  
imprints, dinosaurs and humans, are  
moving together to escape the terrible  
disaster.

But no refuge. No! Had 120 years  
to seek higher ground. No such refuge.  
The Ark rested on Mt. Ararat, 17,000'.

The human race not so much  
primitive, but highly sophisticated.  
Gen. V: 17, 20, 21, 22  
like cities  
in smelting  
mineral industry

The judgments of the  
the blood

3000 BC - 576 BC  
7000 BC - 70 AD
