

THE FIRST FACT: GOD THE CREATOR.

Once, Bow Before God (Gods). Now, bow before science.

A new spirit of veneration. Bow down with a blind faith  
and knees to the so-called credulous, Bible believing age. Are  
we going willingly to surrender the eternal verities of God's  
revelation for the unproven theories propounded by man.  
of "Refuse to accept Creator, Deity." "How did man come?" "Evolution." "Nature, given  
matter." "Creation." "Matter." "Nature is matter; always was."  
The missing link? "New article." Should be missing, till now unproven.  
Down every road, in every jungle, fossils by the hundred millions.

No fear of, general with, true science. Fact. Bible can be tested, verified,  
not true to fact, and news, and. But fact - with theory, dogmatism,  
organization.

I. The Demonstration of Intelligence (God) in the Universe.

The first & fundamental: God is. "The first fact is in His hand, there."  
Can this be demonstrated? Yes.

1. unvarying  
The first law of logic: "Begin with a fact that is universally conceded."  
The universal fact: "There is a Cosmos. You are. The universe is real  
independent, self-sustaining, self-existent, self-organizing, self-evolving,  
& a masterpiece, complex system. Atoms, molecules, cells, plants, animals,  
man, planets, galaxies in our galaxy. How may  
there be more?"

The eternal question, "Where?" "Out of nothing, nothing comes."

2. The fundamental law of physics: "All transformations of matter  
that result in the production of energy are a result of degeneration;  
& break down from the complex to the simple."  
of generation } moves the opposite, to build up from the simple to complex  
of eternal fusion

No matter what your theory of creation may be, you have to start  
with a universe already charged with a tremendous amount of high  
grade energy, like a hot wound up, started, running down very fast.  
The eternal question: "Who wound it up?"

Dec. 1:1

# The First Fact: God The Creator

I. One, Bone Before God: By God, Mother, & 2. Now - Bone In God Science

Our new 20<sup>th</sup> day. "What does science have to say on the subject?" One, the Bible. But now how about with a "blind faith unknown to the credulous eye called the eye of Bill Belovis." A new spirit of generation.

all right if these sciences. But amazing willingness to surrender. No plan. Bible can be tested by a standard of truth. of the Great Body not in a case with known, proved fact, then not the word / say. But fact - not theory, improves hypothesis. This generation: an amazing willingness to surrender the eternal soul of God revealed for the unproven theories propounded by men, utterly unable to prove that world in agreement.

you, unchanged, unobtrusive. The Bible - thousands of years, when conclusions are agreed upon, demandably. But not discard Bible for unproved theories.

e.g. (a) God created life, would, come. But is eternal. The always was. One would be no beginning to God. Creation life is life transmitted. The life / death is inherent. "Refuse to accept." "Where the comes come from?" "Evolved." "Out of what?" "Nebulous gaseous matter!" "From where?" "Created." "By whom?" "Nature!" "What is nature?" "Nature is nature - the first cause of myself, always was."

2 II. The Demonstration of Intelligence (that) in the Universe.

In the discussion of a problem, origin, must have an 'A' and a 'Z'. Must start with something, an 'A' must end with something, a 'Z'. begins his the mind cannot go. Possibly to think of a straight line only if we think between two objectives. To reason without an 'A' and a 'Z' is like <sup>to</sup> <sup>claw</sup> <sup>warrensburg</sup> <sup>dog</sup> - chasing his tail.

The first fundamental of the 13 facts, the 'A', is that there is a Jesus, a God, a Creator who made all things, God is. The fool hath said in his <sup>intelligence</sup> heart there is no God. There is a God who is a Jesus.

Can this be scientifically demonstrated? Yes.

1. We begin with an unvarying law, logic:  
"Begin with a fact that is universally conceded; say reason for that fact to your credence."  
The universal fact: There is a cosmos. You are. It is. The universe is real. There is an. Concrete the planet on which we live, is a stationary, indisputable, ~~undeniable~~, important fact.

~~The physical question~~ <sup>is that?</sup>

We are part of a random, complex system. Inter-  
of the extremes, in all its parts, finite, infinite, microcosm,  
macrocosm. Atomic levels beneath. 350 million miles  
systems exist now, presently, satellites, in our galaxy.  
How may <sup>it</sup> <sup>be</sup> <sup>seen</sup> <sup>beyond</sup>!

3 The eternal question: "where?"  
Kendry, maybe - out of nothing, nothing comes. But  
must be there to get anything out.

2. The fundamental law / physics: "All transformations  
of matter that result in the production of energy  
are a result of degeneration: a breaking down  
from the complex to the simple."  
of the explosion / fission  
of the atoms / atoms.

always, from the complex to the simple. Nowhere is  
physics the opposite process seen - to build up from the  
simple to the complex. No matter what you think  
of creation may be, you have to start with a  
substance already charged with a tremendous  
amount of high potential energy. Like a clock that has  
been wound up so it starts to run by running down  
over time. into nothing it is?

Intelligence in the creation of the world (cosmos)  
(a) To the physicist, what is the law, the will by:  
"How may different kinds of things be there?" "Don't answer;  
just the facts." "No, it's not like that. I don't know  
much, but I happen to know that in all the  
whole world, never, never, never, never, never,  
there are big things, a hundred different things." "You  
are kidding. I know more than a million." "No,  
you can't know a million - for any 96 different  
things which we call elements." "You know some."  
"Salt" "Salt is not an element but yes: a mineral  
called sodium and a piece of gas called chlorine,

my the 7m together, called "Indivision" "blow"  
 "salt." "a crate" "salt is for things. The  
 piece of gas called hydrogen, are sure, gas called  
 4/8m, mixed together, each make? "As"  
 always, these things: 79 piece, gas called nitrous,  
 21 piece of a gas called oxygen, with a "big" 47,  
 pattern of carbonic acid gas. Bill - 7 or 12 1/2  
 7 by a "big" 11

this arithmetic, like the alphabet - the perfect  
 fitness / creator.

d. The word, mathematics, resolution they  
 divisions: ① Factors, which are all numbers, 1-9  
 play 0 of common - multipliers, with the  
 factors. ② Integers. Which they to 2, 3, 4, 5,  
 integers, manageable they factors, usually, solving  
 intricate problems, unimpaired. Bill factors show  
 can't solve, must also have arithmetic.

f. The word, literature, for our language,  
 26 factors alphabet, with over 26 letters, manageable  
 by an alphabet - a report of 17 and result literature,  
 "27 - book" - "literature" "Bill" "Bill" "Bill" until on  
 "Literature", the factors stick.

The creator of his design 96 letters, factors, numbers.  
 the continuation of them, the common, "STAR" the children with / but!  
 of the picture "Picture Rats" "STAR" the children with / but!  
 ARTS TARS. Anagram.

6. Carbon, when an atom of carbon is  
arranged in a network of crystals so the next atom  
is touched at its point by 4 other atoms the  
was called "diamond". Another arrangement -  
graphite (pencil lead) - another val. another  
structure.

Who is the Creator?

① "Chance": must be combined with intelligence. In  
the solution, all 96 forms, was just the: How  
many times cast the 10 factors? mathematics, come  
out the solution, a path? How many times  
cast of a die? fall down a crystal a diamond;  
millions years, never as it. Can chance solve  
an equation? Add a single atom of hydrogen? write  
"Examples!"

② Law.

Fit required for law - a body to maintain, inform it.  
Law of gravity, some body made it that way, what great  
power made it? result in gravity. But  
law itself is a creation. Never a creator. Somebody  
made law.

Can we have creator without intelligence? Yes,  
when the 96 elements, they make themselves  
assemble themselves in an automatic, without aid of  
director. or airplane - a bird, still they can  
do things, without aid of engineer, mathematics.

matter equally created. Creation equals  
intelligence. Intelligence equals personality.  
Personality equals God. Logic demands Scripture  
~~attests~~ states, science attests, the living  
personality of an omnipotent Creator.

God, intelligence, imparted to his words - nature  
God revealed of nature. - God.  
III God in the Book.

7. Matter.  
(a) The egg. Instinct is inherited memory.  
little spider about the size of a button, <sup>about</sup> only coat  
of the north Pacific, makes its nest in an empty  
shell of a large clam & of an large bivalve.  
Swings this discarded shell by the dry silk  
cable to the anchorage, hangs it some few inches  
about 20" from the ground. A pigon is  
singing nearby for her. Shell 2 lb. the egg part  
7 or 8. This is in rain 3000 ft. above, shell  
1800' into clouds. How? Scientific knowledge,  
singing technique. The mother is solved by the  
spider of the region in finite objects, & acutely  
perceptive. Sometimes this spider has become  
the law of physics; a large object will break & scatter.  
Locates a shell in relation to a buoy, swings down  
leaf behind & thread as with it can make it. Then  
or over it. or, or. Patience. until swing is  
position shown. - Busy activities the spider by thread  
given

2. into strong limited calls. This rule will sell  
 every waterway every hour which, with the  
 in the world, settle down to near the word.  
 How did you know dogs' throat ring  
 content rain the shell? "Bird" "I believe  
 many - in birds in water knowledge for the next  
 parent - until back to the fit birds to die  
 do." "Then if one side learns it for the other  
 preceding parents, do fit birds that we die  
 the rat down - "Spines" "to it."

Instant is important reason of the water  
 to need water knowledge created to remain  
 in its environment.

Dog learn to bark but the way not  
 indicated of the puppies they must learn by sight  
 Duck hatched know how to swim.  
 A mind which enters was the minutes, (C.)

- Harry Rimmer, "Harmony of Science  
 and Scripture"
