 years. Roman Empire

2. Descending in value
a most striking feature i... gold does to mind
why?

1) The Quality

There is a downwardness, a deteriorating tendency in all society,
national life, individual life. Begins in gold, goes on to silver, then to
brass, then to iron, then to lead, then to tin, then to copper, then to
zinc, then to nickel, then to cobalt, then to manganese, then to
chromium, then to vanadium, then to niobium, then to molybdenum,
then to tungsten, then to rhenium, then to osmium, then to iridium,
then to platinum, then to gold.

2) The cohesion
Great nations... long... most aggregated in fact & form.
The quality apart in national, political life. Crucially state
history runs in the mould of geography. Greater cohesion
descended all nations

3) The nature of all nations
The essence running down. A final level reached?
Animal life. Five breeds, with, birds, left alone, no reference?
Human life and history.

Darwin - a head of mind, no, no, y. to all attempts
Darwin - gold, down, down... to mind.
Can history verify?

Dan. 2: 31-45

The Sweep of Babylonian History

2:19 the dream revealed to Dan. It was not a king's nightmare; it was a real revelation. But often even facts for the 2nd, 3rd, 4th, 5th, 6th years to see that Dan's interpretation is not the only one of it might be read distinctly, every part should be explained.

2:31 'great images'... 'great images' there was said. = colossal

3:31 'terrible' viz. billows, and only forgetting

3:32-34 to separate parts

2:37, 38 the king to all... [The king of the Babylonians, Darius...]

Concerning world war I, 1914, I. M. HALOEMAN:

"In the centers of civilization, supposed supreme, and in those nations where kings and sovereigns claim to have received the scepter from the right hand of the Son of God himself, in those nations above all others calling themselves 'Christians', millions of armed men, drawn from every rank of life, are leaping at each other's throats like wild beasts drunken with one another's blood. Smoke and flame

are going up from burning
towns and cities; women are
ravished in the open sunlight;
children are mutilated, and
all the fabric of a civilization,
woven together through the
sacrifice and devotion of
long and painful centuries,
has been torn apart and
the priceless texture flung
broadcast upon the cyclonic
winds of an remorseless and
lawless desolation. All
the standards of righteousness,
of sacred truth and honor,
the beauty of man to man,

and all the worthfulness and
sanctity of life have been
trampled into the mire
and slush and multiplying
streams of wasted blood."
