Was There Ever Such a Flood?

Certain circles treat it as a nursery tale, mythical
creation of the migration. For the distribution of fossils
spread among the young, no more powerful language
than "Noah's Ark".

I. Testimony of Geology.

Surely such a catastrophe recorded in the earth?

(a) Mr. C. F. Woodley "..."
(b) Sir. A. Wright "..."

But in my reading, came across much more:

(a) Sir Henry Howarth, distinguished geologist, 3 vols.
"The main earth and the Flood" 1887
"The Global Nightmare and the Flood" 1892
"The earth" 1905

The author demonstrates that continental ice sheets
could not have done the work attributed to them, but
that huge sea-levels around produce the phenomena.

(b) Sir J. W. Dawson, equally distinguished geologist.

II. Testimony of Tradition.

Surely such a catastrophe recorded in the history of the world.
Yes, throughout the five continents, traditions of the flood
are the common heritage of the nations.

① Chinese.

Time date, flood 4,000 yrs. before 1200 B.C. Fuh-ho
regarded as the author of this civilization, escaped from the
flood which destroyed the human race, with himself his
wife, 3 sons, 3 daughters. Fuh-ho with wife propagated.

② Hindu

Legend in Veda, as far back as 1000 B.C.

③ Chaldean, Babylon, Tablets.

Discovered by Geo. Smith, 1866, record a tradition
very much more than 2000 B.C., account - crude,
polytheistic form of the same story as related in Gen.

④ Greek classical versions especially striking.

of Hesiod, the didactic poet of 8th c. B.C.: Ross
inquiry, Zeus down to destruction, storm of education
warms, regarding judgment, constructs boat according
to instructions directly given. All men had perished
except Deucalion, with 3 sons, 3 daughters. Boat landed
in Parnassus. Sent forth dove which returned, lower
snow which alighted on roof of ark with bird on
down.

all this from nothing? No. The judgment is
awful, terrible, left an indelible impression upon
memory of the race thousands of years could
not pass, upon.
