

Radiologic Technology Program

- **Program Mission Statement:**

The program provides and maintains a supportive learning environment and curriculum that prepares students for entry-level, diagnostic radiographer positions.

- **Program Goals and Student Learning Outcomes**

Goal 1: Students will competently perform entry-level radiologic procedures.

Student Learning Outcomes: Students will produce quality diagnostic images.

Students will exercise proper radiation protection.

Students will practice proper patient care.

Goal 2: Students will develop problem solving and critical thinking skills.

Student Learning Outcomes: Students will be able to modify standard procedures to accommodate patient conditions.

Students will be able to adjust radiographic factors to produce optimal quality images.

Goal 3: Students will apply effective communication skills.

Student Learning Outcomes: Students will communicate effectively with patients.

Students will exercise effective written communication skills.

Goal 4: Students will exhibit professional values.

Student Learning Outcomes: Students will display professionalism.

Students will demonstrate understanding of ethical behavior.
