

She is why I **give**. Ask me why.

THE CHALLENGE—

Nearly 1,000 children under 5 die every day as a result of contaminated water, poor sanitation, and improper hygiene.

Millions of women and kids walk an average of 6 kilometers every day just to get water, keeping them from school and other productive work.

THE OPPORTUNITY—

World Vision is reaching one new person every 10 seconds with clean water — working to reach everyone, everywhere we work, by 2030.

This is what lasting change looks like—

- » Wells, pumps, and water points for lasting access to safe water
- » Piping systems to irrigate crops
- » Water purification equipment to treat water contaminated by bacteria and other disease carriers
- » Storage containers for rainwater
- » Hygiene promotion, including menstrual hygiene education for girls and women
- » Latrines and hand-washing stations
- » Programs that support behavior change for long-term improvements in health

YOU CAN MAKE A DIFFERENCE

To make lasting change for clean water with your colleagues, go to worldvision.org/WhyIGive.
