

ANNUAL SPONSORSHIP PACKAGE

thewellloved.com

Dear Friends,

In 2017, our hearts were broken. We learned that there are children, families, and communities living in deplorable conditions without access to clean water. Imagine your only option is to walk 3.5 miles every day to get water from a dirty river – the same river where animals drink and bathe that is teeming with bacteria.

Did you know 1000 children under the age of five die every day from diseases caused by contaminated water? These children are more than raw statistics, they represent precious lives that could not only live but thrive with the gift of clean water and sanitation! With access to clean water, lives are not only saved, but communities can become self-sufficient and lift themselves out of poverty.

We formed Well Loved to bring awareness and raise funds for water. In partnership with World Vision, the largest global Christian charity and leading non-governmental provider of clean water, Well Loved is providing clean water to the most vulnerable communities in Africa. And thanks to World Vision's holistic model, we are also paving the way to eliminate extreme poverty forever in that part of the world.

Our goal for this year is to raise \$200,000 to reach 4000 more people. We are inviting corporations, small businesses, private foundations, and philanthropic families to join us in this journey. With your partnership, we will have the power and resources to help hundreds of thousands of people in desperate need. We would be honored- and suffering children will be forever blessed- to have you join us as a partner of Well Loved.

Sincerely,

Lori Armstrong
Well Loved Co-founder

Sheryl Bergquist
Well Loved Co-founder

OUR BOARD MEMBERS

LORI ARMSTRONG

Lori is no stranger to the suffering of a sick child after battling her son's cancer for the first five years of his life. Witnessing the blessing of God's healing hand over her son fueled her passion for making resources available to suffering children all over the world.

Lori is a California native. After graduating from USC, she worked for IBM as a marketing representative. She then chose to focus full time on her children and later returned to her most fulfilling work as Women's and Outreach Director for her church. Lori is blessed to be married to Doug. Together they enjoy traveling, all things outdoors, spending time with their combined 9 adult children, and spoiling their 12 wonderful grandchildren.

SHERYL BERGQUIST

In 2010, during a journey to Egypt's pyramids, Sheryl had a profound experience. Peering through the car window, she encountered a distressing sight - children bathing alongside their mothers, washing clothes in the same murky waters where animals deposited waste. This moment ignited a passion within her, a calling to provide clean water to the world's neediest and raise awareness about this vital cause. Growing up in a military family exposed Sheryl to the joy of travel and connecting with people from various walks of life. She's a Registered Nurse specializing in psychiatry nursing. In 1983, Sheryl married Craig, and they are blessed with two children and five grandchildren. Sheryl's passion for providing clean water led to the creation of "Well Loved," and her journeys to Africa have continued to reveal to her the transformative power of clean water in impoverished communities.

KIM LILJEGREN

Kim began her interest in Well Loved's mission and work in 2019. She had just recently retired and was looking for an opportunity to give back and bless others. God put Sheryl Bergquist in her path during a Bible study, and two years later, after visiting Africa and seeing with her own eyes the overwhelming poverty and need, she fully committed to helping provide clean water to the most vulnerable. Kim was born in Fresno but has lived in Southern California for most of her adult life. She graduated as a Speech Therapist from CalState Fullerton. Kim and her husband, Tom, have five adult children from their first marriages and 4 grandchildren, with twins on the way! Besides volunteering with Well Loved, Kim loves spending time with her family, oil painting, and taking care of her golden doodle, Sophie.

WHY SHOULD WE INVEST IN WATER?

Globally, 785 million people lack access to clean water.

Without clean, easily accessible water, families and communities are locked in poverty for generations. Children drop out of school and parents struggle to make a living.

More than 1000 children under five die every day from diseases related to dirty water and bad sanitation.

Women and girls most often bear the burden of carrying water for their families. In Africa, they walk an average of 3.7 miles per day to get water. Often they are put at risk of wildlife, harassment, and sexual assault.

ACCESS TO CLEAN WATER CHANGES EVERYTHING!

It is a critical stepping stone to development, self-empowerment, and eliminating extreme poverty for good!

When people gain access to safe water, they are better able to practice good hygiene and sanitation. Children enjoy good health and are more likely to attend school. Parents put aside their worries about water-related diseases and, instead, they can water crops and livestock and become self sufficient.

"I was thirsty, and you gave me something to drink."

Matthew 25:35

ABOUT KENYA

Kenya has a population of over 50 million, but the statistics are stark: Nearly 40%, that is, 20 million Kenyan fathers, mothers, and children, currently lack access to clean water sources. This results in **almost 70% of the population in Kenya living near or under the poverty line.**

Women and children make long, dangerous, exhausting journeys to collect dirty water for their families. A lack of private toilets in schools causes many girls to leave when they start menstruating. Health centers are overcrowded, and many have no access to water, resulting in inadequate sanitation. All of this leads to disease outbreaks. It is heartbreaking to know that **7 out of every 100 children die before turning five.**

Agriculture remains the backbone of the Kenyan economy, but it's nearly impossible to survive on agriculture without access to water. Access to clean water helps solve the many factors that perpetuate poverty, like nutrition, health, education, and generating income.

Your generosity provides clean water to drink, latrines at home and schools, and hand washing stations nearby to keep entire communities clean and healthy, and with the hope of a brighter future.

Women and children collecting dirty, unsafe, polluted water in Nyango Village, in Kwale County, Kenya. Yet, it is the only lifeline for this community.

EXPECTED OUTCOMES OF YOUR INVESTMENT IN KENYA “WASH”

Since 1950, World Vision has been committed to caring and protecting for children and those in need. For decades, they have leveraged resources globally, and worked alongside communities in Kenya to ensure millions of children have access to clean water, dignified sanitation, healthy hygiene practices, and much more. In partnership with World Vision, Well Loved aims to raise \$200,000 annually and help 4,000+ people with clean water for a lifetime through:

 Building seven new or rehabilitated water points in communities and schools ~\$100,000

 Plus, providing a solar-powered water system to help provide water to 2,000+ people ~\$100,000

Thanks to a dollar-for-dollar match secured by World Vision, our investments and impact will be doubled. That means Well Loved and its sponsors could help provide clean water to not only 4,000 but 8,000 people!

The provision of water is crucial for improving the sanitation and overall health of children while they are in school.

WORLD VISION'S APPROACH TO “WASH” IN KENYA

Water Supply

In Kenya, World Vision collaborates and coordinates efforts with local partners to construct water systems that deliver clean water to household, community, school, and/or health center taps. As they increase the installation of piped-water systems with taps, they help ensure equitable water access, reduce WASH-related diseases (such as diarrhea) and deaths, and improve child well-being.

Water Security and Resilience

World Vision supports communities to develop mitigation plans to address water scarcity and conduct watershed management activities. They also equip families with tools to practice water conservation. Many villages experience long drought seasons, but to help build resilience, families are provided with equipment to conserve water during the rainy season in order to have enough for crops and livestock.

PARTNERSHIP LEVELS	BRONZE \$5,000	SILVER \$7,500	GOLD \$10,000	WATER POINT PARTNER \$15,000	VISIONARY PARTNER \$25,000
Help provide clean, life-saving water for a lifetime to:	100 children	150 children	200 children	A village of 200-300+	A village of 500+
