

KEEPSAKE MONOGRAMS v1.0

© 2012 Harold Lohner

A unique font that lets you create custom 1- or 3-letter monograms in distinctive script capitals with or without a choice of 8 decorative borders.

1. Install the font like any other. (Google: Install fonts in [my operating system].)
2. Relaunch the program you're working in. Now you're ready to make custom monograms.
3. Choose a border if desired and type it first, keystrokes in red.

4. **For a 3-letter monogram**, type a lowercase letter (a–z) for the left letter.
5. Type an uppercase letter (A–Z) for the center letter.
6. The right letter is a bit trickier. Use this chart to locate your letter on the standard keyboard. And then your 3-letter monogram is complete.

A ... 1	B ... 2	C ... 3	D ... 4	E ... 5	F ... 6
G ... 7	H ... 8	I ... 9	J ... 0	K ... !	L ... @
M ... #	N ... \$	O ... %	P ... ^	Q ... &	R ... *
S ... (T ...)	U ... - or _	V ... = or +	W ... [or {	X ...] or }
Y ... \ or	Z ... ; or :				

7. **For a 1-letter monogram**, replace the first letter with < for the decorative flourish, or simply hit the space bar for no decoration. After the center letter, type > for the flourish and your 1-letter monogram is complete.
