Set of 4 unique fonts to create custom monograms of any number of letters, in a distinctive Egyptian Revival style within ornamental cartouche frames. Options include vertical or horizontal format, inlines or solid, and a selection of hieroglyphic ornaments.

Using the Egyptian Monograms fonts:

First, install the fonts like any other.

1. **In the horizontal format fonts**, One and Two, type < first
2. Then type your monogram of any length. Some of the letters in the upper case include decorative elements, the lower case do not.
3. Then complete your cartouche by typing >.
4. If you prefer, you can substitute < and > (the most authentic pair) with these other choices. There's also a blank space at _ [underscore].

5. **In the vertical format fonts**, Three and Four, follow steps 1–5 above, then rotate the completed monogram 90° clockwise.

In any of the fonts, you can include these ornamental elements within the cartouchet before or after the letters.
