2021 Collectible of the Year

Zippo celebrates 100 years of Art Deco with the 2021 Collectible of the Year.

The Art Deco design movement blossomed in the United States during the Roaring Twenties as the perfect architectural complement to the bold and lavish era. The inventor of the Zippo Windproof Lighter, George G. Blaisdell, was heavily influenced by Art Deco when he created the Zippo lighter and designed the earliest decorated lighters with clean, elegant geometric patterns that added another layer of sophistication to the shiny chrome finish.

The 2021 Collectible of the Year pays homage to the beauty and splendor of Art Deco by combining multiple cutting-edge processes, classic elements, and a sparkling embellishment available exclusively in the Americas.

The High Polish Black Classic Windproof Lighter is transformed into an Art Deco masterpiece by 360° Laser Engraving and selective gold plating. The crown jewel of each lighter is the kite-shaped Golden Shadow Swarovski® crystal emblem, chosen exclusively for the Americas version of the collectible. Each lighter is consecutively numbered and features the special bottom stamp that denotes it as a Zippo Collectible.

Don't miss your opportunity to offer the first Zippo global collectible that is also unique and exclusive to your region – production is extremely limited.

540 Color Completely Covers the Whole Lighter

Zippo's 540 Color process allows for complete coverage of the lighter's surface with full color, durable designs. Hinges and bottom stamps are lasered clean to allow for peak performance and easy date stamp verification, but otherwise every single surface of the lighter can be covered seamlessly by this new process.

Imprint Methods

Methods available to customize Zippo product.

Signature Custom Imprint Methods

Auto Engrave

The crisp, clean jewelry look of auto engraving has become one of the most popular methods of customization. Skilled operators use either rotary engrave or diamond cut method to inscribe an image into the product using creative fill patterns. A dimensional effect can be achieved by using directional fill patterns. Also known as Rotary Engraving or Computer Engraving.

pg.12

Laser Engrave

This state-of-the-art process allows Zippo tremendous flexibility when reproducing your artwork on our products. Our laser engravers are computer programmed to generate an accurate replication of your imprint. Also known as Laser Mark.

pg.13

Color Image

State-of-the-art printing method allows Zippo to imprint multiple spot colors or full-color photographic representations. Spot colors can be matched to PMS colors and used for one, two, or three-color simple logos.

Previously known as surface imprint.

- Zippo will accept vector artwork files (Adobe Illustrator) in these formats: .ai, .eps, .pdf (provided entire contents of file are vector). Zippo can also imprint artwork in full color or a photographic representation. Previously known as 4-color process pad print.

- Zippo will accept raster artwork files (Adobe Photoshop) no less than 1.5" wide by 2.25" high with a resolution of 600 DPI (dots per inch). Acceptable formats include .psd, .tif, .eps, .jpg (provided the resolution is high enough). Any file requiring background isolation must have paths or a layered file with transparent background included.

Vintage Lighters

There's Nothing Old About Zippo Vintage

The success of Zippo's 50th anniversary commemorative lighter in 1982 was a strong indicator that Zippo customers and collectors were receptive to the addition of more vintage-style lighters to the product line. Zippo Vintage lighters were introduced in 1985, designed after a similar Zippo lighter created in 1937.

Distinctive features:

- Five-barrel hinge that joins the lid and the bottom; same as current Zippo lighter.
- Sides of the unit are flat, with rounded corners and edges replicating the 1935 square case.
- Flat bottom and top case with current bottom stamp.
